Introduction

The purpose of this handbook is to acquaint you with the policies and procedures of the College of Nursing (CON) and the University of Illinois at Chicago (UIC) and to provide you with the information you need as you pursue your program of study. You can navigate through this document by either clicking on a topic in the Table of Contents or using the bookmarks. You can access websites and other documents referenced in this handbook by simply clicking on the underlined text.

This handbook includes information for students in all UIC CON degree programs (BSN, MS, DNP, and PhD). Students in the DNP program should also consult the Doctor of Nursing Practice (DNP) Handbook and students in the PhD program should consult the PhD Handbook for additional information specific to those programs.

Mission, Vision, and Values

Mission

The mission of the UIC CON is to transform health, healthcare, and policy through knowledge generation and translation, and education of future leaders from diverse backgrounds.

Vision

Our vision is to be a preeminent leader in advancing global health and nursing.

Goals

1. Develop a diverse, collaborative intellectual community.
2. Prepare and enable nurses to lead change to advance local and global health.
3. Develop innovative educational models to accelerate the development of highly competent clinicians and scholars.
4. Generate knowledge that has a lasting impact on health, healthcare, and policy.
5. Build faculty excellence in teaching, scholarship, practice, and service.
6. Build staff excellence in administration and delivery of College programs and products.
7. Maintain financial viability while decreasing dependency on State funds.

Values

At the CON, we:

- Commit to and partner for knowledge, discovery, and discovery learning.
- Strive for and motivate adherence to high standards and competence.
- Model and promote diversity, trust, and respect.
- Enact and enable compassion, caring, and sensitivity.
Program Accreditation

The University of Illinois at Chicago is accredited by the Higher Learning Commission (HLC) of the North Central Association of Colleges and Schools (NCA). The CON’s doctor of nursing practice, master’s, and baccalaureate programs are accredited by the Commission on Collegiate Nursing Education (CCNE); the master’s and baccalaureate programs are approved by the Illinois Department of Financial and Professional Regulation. The Nurse-Midwifery program is accredited by the American College of Nurse-Midwives, Accreditation Commission for Midwifery Education (ACNM). The College holds membership in the American Association of Colleges of Nursing (AACN).

Program Outcomes

Bachelor of Science in Nursing and Graduate Entry Program (Pre-Licensure) Program Outcomes

Upon completion of the Bachelor of Science of Nursing (BSN) program or the pre-RN licensure course sequence in the Graduate Entry Master of Science Program (Graduate Entry MS) the student will:

1. Provide competent care across the lifespan to patients, families, and communities within the context of their cultures.
2. Apply principles of scientific inquiry and critical thinking to provide evidence-based care.
3. Apply leadership skills in guiding and influencing individuals and groups in evidence-based healthcare.
4. Apply principles of management in the provision of healthcare to individuals, families, and communities in a variety of organizations.
5. Systematically utilize the nursing process to provide or coordinate healthcare and to address complex health issues across the lifespan for individuals, families, and communities.
6. Communicate therapeutically and professionally in a variety of settings.
7. Use ethical decision-making frameworks and the Code of Ethics for Nurses to anticipate issues, to guide nursing practice, and to resolve conflicts related to healthcare.
8. Apply legal guidelines, regulations, and standards in professional nursing practice.
Master of Science Program Outcomes for Specialty Practices (admitted prior to 2014)

The Master of Science (MS) in nursing builds on the baccalaureate curriculum in nursing and builds on the concepts of communication, critical thinking, and therapeutic nursing intervention. At the completion of the MS program, the graduate:
1. Demonstrates competencies for advanced practice in nursing.
2. Analyzes current knowledge for nursing practice and for inquiry.
3. Uses knowledge to adapt nursing interventions based on the interrelationships among person, environment, health, and nursing.
4. Evaluates effectiveness of nursing intervention and health systems on outcomes.
5. Conducts scholarly activity to advance nursing knowledge.
6. Demonstrates leadership in nursing and in multi-disciplinary health environments.

Master of Science Program Outcomes for Advanced Generalist (AGMS & Graduate Entry; admitted 2014 and after)

At completion of the Advanced Generalist Master of Science Program, graduates will be able to:
1. Integrate advanced knowledge of science and humanities in the practice of nursing.
2. Employ organizational and systems leadership principles in high quality ethical care.
3. Apply quality improvement methods, tools, performance measures, and standards for safe and effective care within systems.
4. Critically evaluate, develop, and implement culturally appropriate evidence-based practices.
5. Integrate, appraise, and coordinate care using health and information technologies.
6. Collaborate to implement system-level policy changes and advocacy strategies to improve health of populations.
7. Facilitate communication and collaboration essential for coordination within interprofessional teams.
8. Apply principles of social justice and cultural humility to maximize equitable health outcomes throughout the continuum of care for diverse populations.

Doctor of Nursing Practice Program Outcomes (admitted prior to 2014)

At completion of the Doctor of Nursing Practice (DNP) program, graduates will be able to:
1. Demonstrate the specialty competencies needed for doctoral practice in nursing.
2. Translate science to influence healthcare policy.
3. Implement evidence-based practices to optimize healthcare outcomes and reduce disparities.
4. Practice strategic management skills to improve the effectiveness of nursing interventions and health systems outcomes.
5. Develop transdisciplinary ventures to create innovative healthcare delivery models.
6. Demonstrate fiscal leadership in planning and management for nursing practice.
7. Integrate technology with nursing practice skills to improve quality and accessibility of care.

**Doctor of Nursing Practice Program Outcomes (admitted 2014 and after)**

At completion of the Doctor of Nursing Practice (DNP) program, graduates will be able to:

1. Translate knowledge from the natural and social sciences to advanced practice nursing.
2. Generate strategies to manage organizational, business, and financial systems to ensure safe, timely, effective, efficient, and equitable patient-centered care.
3. Design, implement, and evaluate evidence-based practice to optimize health and healthcare outcomes in individuals, families, communities, and organizations using knowledge and technology from diverse sources and disciplines.
4. Lead the design, selection, and implementation of technology and informational programs/systems to monitor and evaluate programs, outcomes, and systems of care.
5. Develop, influence, and advocate for health care policy at all levels that addresses issues of social justice, health care equity, and practice regulation.
6. Collaborate and lead interprofessional health care teams in diverse and complex health care settings and systems.
7. Translate evidence-based knowledge to practice for the promotion and maintenance of health for individuals, families, communities, and populations.
8. Provide evidence-based comprehensive biophysical and psychosocial care to individuals and families according to the competencies of specialty practice within a framework of cultural humility.

**Doctor of Philosophy Program Outcomes (admitted prior to 2016)**

Upon completion of the Doctor of Philosophy (PhD) program, graduates will be prepared to:

1. Critically synthesize knowledge from nursing and related disciplines to contribute to nursing knowledge and inquiry.
2. Conduct original research and scholarly work that contribute to the generation and dissemination of new knowledge relevant to health and the discipline of nursing.
3. Continue to develop as experts within an area of inquiry important to nursing and health.
4. Provide leadership in nursing, research, healthcare, and health policy.

**Doctor of Philosophy Program Outcomes (admitted 2016 and after)**

Upon completion of the PhD program, graduates will be prepared to:
1. Critically synthesize knowledge from nursing and related disciplines to advance nursing science.
2. Conduct research to generate and disseminate new knowledge to inform policy, theory, and practice.
3. Become an expert within an area of inquiry important to nursing and health.
4. Provide leadership in nursing, research, and health care.
5. Engage in scholarly work that advances nursing and health.
6. Demonstrate skills in teaching, research, leadership, mentorship, and interprofessional collaboration.

See Appendix A for Program Essentials, Outcomes, and Competencies.

Grading Scale and Policies

The grading scale for the CON is as follows:

<table>
<thead>
<tr>
<th>Grade Range</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>90-100</td>
<td>A</td>
</tr>
<tr>
<td>80-89</td>
<td>B</td>
</tr>
<tr>
<td>70-79</td>
<td>C</td>
</tr>
<tr>
<td>60-69</td>
<td>D</td>
</tr>
<tr>
<td>&lt; 60</td>
<td>F</td>
</tr>
</tbody>
</table>

Most courses use the traditional grading system, providing grades of A through F. However, grading may take other forms including:

S—Satisfactory; U—Unsatisfactory.
Used as grades in thesis research courses, in zero-credit courses, and in specifically approved courses. No grade points are earned and the grade is not computed in the cumulative grade point average. In the case of thesis research courses, instructors should assign an S or U grade to the course each term until after the thesis defense is successfully completed. An Unsatisfactory grade can be assigned at any time when the student is not making satisfactory progress in thesis research. If an unsatisfactory grade is assigned, the Admissions and Academic Standards Committee—Graduate will review the status of the student and a warning letter will be sent to the student. A grade of U is the same as a grade of C or less. Continued lack of satisfactory progress will result in review by the Graduate College for possible dismissal.

DFR—Deferred.
Deferred grades may be used for thesis courses, continuing seminar, sequential courses, and certain courses that require extensive independent work beyond the term. At the end of the continuing course, the deferred grade for all terms must be converted to either a specific letter grade (A-F), an “I” (Incomplete), or an S or U. No credit is earned until the DFR grade
converted to a permanent grade.

I—Incomplete.
A grade of “I” may be assigned in lieu of a failing grade only when all of the following conditions are met:
1. The student has been making satisfactory progress in the course.
2. The student is unable to complete all course work due to unusual circumstances that are beyond personal control.
3. The student presents these reasons prior to the time that the final grade is due.
4. The reasons are acceptable to the instructor.

The instructor must submit an Incomplete Grade Assignment form for each “I” recorded. This form is a contract for the student to complete the course work with that instructor or one designated by the department executive officer in the way described and by the time indicated on the form. The student may not register for the course a second time to resolve the “I” but rather must follow the procedures detailed on the Incomplete Grade Assignment form.

• Resolution of “I” grade for undergraduate students. An “I” must be removed by the end of the student’s first semester or summer session in residence subsequent to the incurrence of the “I” or, if not in residence, no later than one calendar year subsequent to the incurrence. When the student submits the course work, the instructor will grade it and change the “I” to the appropriate grade. If an undergraduate student fails to meet the stated conditions, the instructor will assign an “F” for the final grade.

• Resolution of “I” grade for graduate students. An “I” must be removed by the end of the next term in which the student is registered (including summer) or within twelve months of the end of the term in which the “I” was received, whichever occurs sooner. Course instructors may require an earlier deadline. When the student submits the course work, the instructor will grade it and change the “I” to the appropriate grade. An “I” that is not removed by the deadline will remain on the student’s record as an “I,” with no credit earned. A course in which an “I” was received and not removed by the deadline may be repeated for credit only once.

NR—Not Recorded.
The symbol is automatically generated when no grade is submitted by the instructor. If a student received an “NR” for a course grade, he/she should contact the course instructor to verify if the grade has been posted.
**W – Withdrawal**
Students may withdraw from courses a maximum of four times throughout their entire graduate program. Students may withdraw from a course **only** one time.

---

**Undergraduate Academic Standards and Policies**

**Dean's List**
Outstanding academic achievement in the CON is recognized by inclusion on the Dean's List. Eligibility is based on 3.35 (A=4.00) term grade point average with a program of 12 semester hours of letter grades in a semester.

**Academic Probation and Dismissal**

**Probation Rules**
All students must satisfactorily complete all required LAS (non-nursing) and nursing courses with a minimum grade of C and maintain both a cumulative UIC (non-nursing & nursing) and a nursing grade point average of 2.00/4.00. When the student receives one grade below a C in required LAS (non-nursing) and nursing courses or their cumulative grade point average is below 2.00/4.00, the student is placed on probation.

A student currently on academic probation will remain on probation when:

1. The student meets the grade point average required by the conditions of his or her probation **but** does not raise the cumulative UIC grade point average to at least 2.00; or
2. The student meets the grade point average required by the conditions of his or her probation **but** does not raise the combined average of the student’s transfer and UIC course work to at least 2.00.

The Undergraduate Admissions and Academic Standards Committee determines the conditions of probation. In addition to specifying the grade point average, the committee may require the completion of specific courses, may limit the number of hours for which the student registers, and may exclude the student from taking certain courses while on probation.

**Dismissal Rules**
A student on academic probation for GPA will be dismissed in any term in which:

1. the student fails to meet the grade point average required by the probation and in which the cumulative grade point average in courses taken at UIC is less than 2.00/4.00.
2. the student fails to meet the grade point average required by the probation and in which the combined transfer and UIC grade point average is less than 2.00.

A student who fails to make progress toward a degree may be dismissed. Examples include failure to complete required courses, accumulation of an excessive number of incomplete grades, failure to earn credit in any semester.

Students may not earn more than one grade below C in nursing courses during the entire academic program, in either the same or two different nursing courses. When a student receives a second grade below C in a nursing course, the student will be dismissed from the CON—withdrawn for academic failure. Students dismissed from the CON will also be dismissed from the University.

**Repeating a Course**

If a student does not receive a C grade or higher in a nursing course, the student is required to repeat the course. A student may repeat a nursing course or its equivalent only once. If a grade of C or higher is not earned at the end of the second registration in a nursing course or its equivalent, the student will be dismissed from the College.

A nursing course in which a grade below C is received must be repeated the first term the course is offered again, in which space is available, and prior to enrolling in any other clinical course.

The original grade for the course and the grade for each repeat will appear on the transcript and will be calculated into the grade point average unless the student initiates a request for **Repeating a Course with Grade Point Average Recalculation** as described below. Only one registration for the course counts toward the total number of credits required for graduation. A course cannot be repeated after receiving credit in a subsequent course for which the “repeat” course is a prerequisite.

The Repeat Policy for Standard Graded Courses from the Office of the Registrar may also be found on their [website](https://www.uic.edu).
For the grade point average recalculation policy to apply, a student must declare to his or her college the intent to repeat a course for a change of grade. Students must submit this request to their college before the end of the official add/drop period, no later than the second Friday of the fall and spring semesters, the first Wednesday of Summer Session 1, or the first Friday of Summer Session 2. The course must be repeated within three semesters of the receipt of the original grade, and it must be taken at UIC. Only one registration for the course counts toward the total number of credits required for graduation.

Undergraduate students are allowed grade point average recalculation in up to four repeated courses. Under the course repeat policy, all courses taken and their grades appear on the transcript in the semester in which they were taken. Under the grade point average recalculation policy, the grade earned the first time the course is taken will be dropped from the calculation of the cumulative GPA and the grade(s) earned when the course is repeated will be used in the calculation. This rule holds, even if the second grade is lower than the first. If a course is repeated more than once, the first grade is not counted in the GPA, but all other grades for that course are calculated in the cumulative GPA.

More information on the University repeat policy for standard graded courses can be found in the *University Degree Requirements, Graduation, and Commencement* section of the *Undergraduate Catalog*.

**Performance Warning**

Students are given written warning in the form of an "Academic Improvement Plan" by their faculty after an instance of not making satisfactory progress in the theory and/or practicum portion of a required course. The Academic Improvement Plan form can be found on the *Forms page* on the CON website. The warning will list specific areas in which the student has failed to meet course objectives and will also list specific steps the student must take to be successful in the course. The warning is discussed with the student, who may add comments. The faculty will then forward the form to the Director of Student Services for forwarding to the student’s advisor. The student must schedule an appointment to meet with his/her advisor within five (5) days of meeting with the instructor. Urban Health students are also encouraged to meet with the Assistant Director for Urban Health. The advisor will forward a copy of the completed form to the instructor and the student will receive a copy. Students can be referred to resources such as the CON Student Success Center, the Academic Center for Excellence (ACE), or the UIC Writing Center for assistance.
Graduate and Professional Academic Standards and Policies
(AGMS, DNP, Graduate Entry MS, and PhD)

Graduate students are governed by the policies of the University of Illinois at Chicago (UIC), the Graduate College, and the College of Nursing. Students in the CON graduate programs should therefore become familiar with the Graduate College policies and procedures for graduate study, which are published in the Graduate Catalog. Graduate College policies on academic standards and degree program deadlines can be found in the Enrollment (see Continuation and Probation Rules) and Degree Requirements (see Degree Program Deadlines) sections of the catalog.

DNP students, as Professional Students, are not subject to the Graduate School policies but are subject to policies of UIC and the CON.

Academic Standard
The standard in the College of Nursing is that all graduate and professional students are expected to:

- Satisfactorily complete all courses with a minimum grade of B or S
- Maintain a minimum cumulative grade point average of 3.0/4.0

Academic Probation
When a student's academic performance fails to meet the standard (e.g., receives one grade of “C” or less, or one grade of “U” in any course), they will receive a letter of warning from the Associate Dean for Academic Affairs and be placed on academic probation.

A student who receives two unsatisfactory grades (“C” or less, or “U”) will be subject to dismissal pending formal review by the CON Graduate Admissions and Academic Standards Committee. This review will be conducted regardless of whether the student has been put on probation by the Graduate College or College of Nursing for a GPA below 3.0.

If a student’s cumulative GPA falls below 3.0, the student is automatically placed on probationary status by either the Graduate College (Graduate Entry MS, AGMS, PhD) or the College of Nursing (DNP).

Terms of Probation
When, for any reason, a student is placed on academic probation, the following apply: The Graduate Academic Admissions and Standards Committee determines the conditions of
academic probation. To be retained in the program, the student must meet the conditions set by the Committee. A student on probationary status for GPA, will have two terms of enrollment to bring the GPA to a 3.0 or above.

- A student whose GPA remains below 3.0 at the end of the second term of probationary status will be automatically dismissed from the program.
- A student may not graduate with less than a cumulative GPA of 3.00/4.00.

Grade review

The Graduate Admissions and Academic Standards Committee will review the student's overall academic performance and determine whether the student will be retained (including conditions of retention) or dismissed from the program.

In preparation for the Grade Review meeting, students who have received two or more grades below the standard are encouraged to submit the following for consideration during the grade review:

1. A letter to the committee detailing:
   a. The extraneous circumstances leading to the receipt of a second unsatisfactory grade, and/or circumstances that contributed to the inability to meet academic standards.
   b. Any actions taken to improve academic performance, including (but not limited to) use of UIC resources, mentoring, and tutoring.
   c. A detailed plan for future academic success if the student is retained in her/his program. The submission of an academic plan does not guarantee retention in the program.

2. Request advisor to provide input to the committee.

Documents must be submitted within five (5) days after faculty grade entry. This due date is found in the University calendar:

https://registrar.uic.edu/current_students/calendars/admin_calendar

If supporting documents are not submitted by the student by the due date, the Committee will render their decision without input from the student.

Students dismissed from the CON will also be dismissed from the University.

Repeating a Course

A graduate or professional student who earns:
• A “D”, “F”, or “U” in any required College of Nursing course
• A grade below a B/S in
  o NURS 532 Comprehensive Health Assessment for Advanced Nursing Practice
  and/or
  o any concentration specialty courses (all theory [management] and practicum
  courses which constitute the requirements of the specialty)
  will be required to repeat the course successfully (a grade of “B” or better) during the
  next period of registration in which it is offered and a seat is available and before
  progressing in any concentration specialty course for which the course with a grade
  below B or S is a pre-requisite.

Students can repeat a course for credit if:

• The course is designated in the Schedule of Classes with the phrase “May be repeated for
  credit.”
• The course is one in which a grade of C, D, F, NC, or U was received. In such cases the
  course can be repeated only once and counted only once toward the degree
  requirements; the original grade continues to be included in the computation of the GPA.

Failure to Progress

Students are expected to demonstrate progress toward the degree in a timely manner. The
Graduate Admissions and Academic Standards Committee will review and make
recommendations for students who demonstrate “Failure to Progress.”

Examples of “Failure to Progress” include but are not limited to:

• Student earns a pattern of “incomplete” grades or two semesters of “withdrawals”
• Student exceeds the time limit for degree completion (MS and DNP programs)
• Student fails to meet the following PhD program benchmarks
  o Year 1 – Program plan complete
  o Year 3 – Course work complete
  o Year 4 - Preliminary exam
  o Year 5 – Proposal/IRB approved
  o Year 6 – Dissertation Defense/Graduation

Degree Completion Deadlines

<table>
<thead>
<tr>
<th>Degree Completion</th>
<th>Timeframe</th>
</tr>
</thead>
<tbody>
<tr>
<td>Master's degree (32 – 40 hours)</td>
<td>5 years</td>
</tr>
<tr>
<td>Master's degree (41 - 64 hours)</td>
<td>6 years</td>
</tr>
<tr>
<td>Joint degree (MS/MPH, MS/MBA, MS/MSHI)</td>
<td>8 years</td>
</tr>
</tbody>
</table>
DNP with prior MS degree  7 years  
DNP without MS degree  9 years

Students who do not graduate by these deadlines will be dismissed from the Graduate College or the College of Nursing for failure to progress. Time spent on a leave of absence approved by the program and the Graduate College is not counted toward the degree time limit.

At the fall and spring grade reviews, the Graduate Admissions and Academic Standards Committee will review student progress. Students who have reached or are approaching their time limit will be identified. After the meeting, the Associate Dean for Academic Affairs will contact the student via letter. In order to remain enrolled in the CON, the student must meet with his/her academic advisor and develop a timeline for completion of the degree program. The advisor will forward to the Committee the timeline with a letter explaining the reasons for the delay in the student’s progress. The Committee must approve this timeline.

Petitions

Students may petition for exceptions to certain College policies or actions, but should do so only after consulting with their advisor whose recommendations must appear with the petition. Petitions must:

- be submitted to the Office of Academic Programs,
- be communicated in writing, and
- include the specific College policy or action and a full explanation of the extenuating circumstances and any appropriate supporting documents.

PETITIONS MUST BE FILED WITHIN THIRTY (30) DAYS of the time an individual knows, or reasonably should have known, that an occurrence has affected his or her status. It can take 4-6 weeks for a petition to be reviewed and a decision to be made.

Program Change Petition

Current CON students who want to change their degree, campus, or DNP specialty must petition the appropriate Admissions and Academic Standards Committee (Undergraduate or Graduate). All changes require Committee approval and are not guaranteed.

All current MS or PhD students who want to change to the DNP program (or vice versa) must submit a new UIC application – http://admissions.uic.edu/. A new application fee and resubmission of transcripts will be required by the UIC Admissions Office for most applicants. All other program changes require the electronic CON program change petition (https://admissions.nursing.uic.edu/change) After initially completing the online form, an e-
mail will be sent with a link to the full program change application. All questions, including essays, must be completed in order for a petition to be reviewed.

All fall semester program change petitions must be submitted by January 15th of the year in which change is desired. Spring semester program change petitions are due by October 15. Students must discuss any potential change to program plans with their student advisors before submitting a petition. A statement from the student’s advisor supporting the program change is required as part of the petition. The Program Change Petition will include a space to enter your advisor’s name and e-mail address. After entering this information, advisors will be e-mailed a link to submit a statement.

Program Change Petitions are reviewed and acted upon by the Graduate or Undergraduate Admissions and Academic Standards Committee 4-6 weeks after the submission deadline. Changing degrees or campuses may impact required tuition and fees.

*Students wishing to change from graduate and professional degrees must adhere to the all University policies. While the most frequent change of degree in the College of Nursing is from the AGMS to the DNP, the policy below applies to all post-baccalaureate transfers.*

*The University considers AGMS and PhD degrees as graduate level and DNP as professional level. The program oversight, degree awarding, and tuition fees are unique to each level. The University has a stated policy which limits the number of credits that can be transferred between levels to 25% of the total degree credits. Students may petition the Graduate College to request that more than 25% of the total degree credits be allowed to transfer between degrees.*

### Course Policies and Procedures

#### Attendance

Attendance at all classroom sessions and discussion groups is expected; missing classroom sessions and discussion groups can have an impact on the student's learning and course grade. Students are expected to prepare for each classroom session by completing the required readings and other assignments.

Attendance at all clinical practicum and lab sessions per course is required (see Practicum Policies and Procedures). Students are expected to prepare for each clinical practicum or lab session by completing the required readings and other preparatory assignments.
Student Expectations in the Clinical Learning Resource Center (CLRC) Laboratory and Simulation Settings

1. Students are expected to maintain the confidentiality of the experience and not share information with their classmates except when asked to reflect with faculty.
2. Professional behavior is expected at all times in the CLRC; users are expected to abide by the UIC College of Nursing Code of Conduct.
3. Students are expected to wear their nursing uniform and/or lab coat as instructed by their faculty and to wear their identification badge when in the CRLC unless participating in an activity that would specifically preclude such identification.
4. Cell phone use is NOT permitted during simulation. The only exception is if a faculty permits use of cell phones as a resource during the simulation case.
5. Absolutely NO eating or drinking in simulation labs.
6. Anyone found intentionally damaging CLRC property or removing property or supplies from the CLRC without permission will be asked to leave the premises immediately. Subsequently, communication reporting the incident will be sent to the appropriate Department Head and/or Associate Dean.
7. Students may be dismissed from the lab area as a result of conduct that is unsafe, unethical, inappropriate, or unprofessional.

Examinations

1. It is expected that examinations will be taken on the scheduled day. If an emergency arises and a student cannot take an exam, the course coordinator must be notified by 7:00 am the day of the exam or as designated in the course syllabus. If a student does not notify the instructor of the inability to be present for an exam until after the exam takes place, the instructor reserves the right to deduct points and/or give the student a 0% grade for that test. It is the student’s responsibility to schedule the make-up exam if allowed. Any exam must be made up within one week following the date on which the exam was originally scheduled or at the discretion of the faculty/course coordinator. Failure to do so will also result in a 0% on the examination. A written statement from the student explaining the extenuating circumstances must be submitted prior to taking the make-up exam. In the event of an illness or injury, medical clearance must be submitted in writing by the medical doctor or nurse practitioner treating the student.
2. Faculty reserves the right to offer the make-up exam in a different format; e.g., essay rather than multiple choice.
3. Students must present their student ID during the examination period as directed by the instructor.
4. Students are required to supply their own #2 pencils with which to complete the computer answer sheets for each exam. If required by the instructor, students must supply their own, non-programmable calculator.
6. It is recommended that students not bring any personal items to the exam room. If students must bring such items, they must be left in the front of the room prior to the exam. This includes, but is not limited to, electronic devices, books, notes, book bags, coats, hats, etc.

7. Students may not wear any type of hats or caps during the exam. Excluded from this rule are students who normally wear the headscarves of their culture. Students will sit every-other-seat and every-other-row for the exam when space is available unless designated otherwise by the instructor. The instructor/proctor reserves the right to reseat students.

8. **Cheating will not be tolerated.** Any cheating or attempts to view another person’s work during the exam that is observed by the instructor/proctor will result in dismissal from the examination, and student disciplinary action may result. Students are expected to report any evidence of cheating before, during, or after the exam to the instructor/proctor/course coordinator.

9. Students are not allowed to leave and return to the exam room unaccompanied until after the examination has been completed.

10. Completed exams and test booklets must be turned in to the instructor/proctor/course coordinator when requested. Failure to do so will result in 0% on the examination.

**Academic Integrity**

**Principles, Beliefs and Statements on Academic Integrity**

Consider these examples for a moment:

1. How comfortable would you be if the only surgeon who could perform your operation cheated his/her way through medical school?

2. How comfortable would you be crossing the Chicago Skyway or traveling across the Jane Byrne Interchange if you knew they had been designed by an engineer who cheated on structural design exams in order to pass the class?

3. Would you trust your tax returns or paycheck to a professional who copied exam answers from another student to get his/her accountant license?

Academic integrity ensures that the knowledge students gain and demonstrate is genuine. When students receive a nursing degree from UIC, it indicates that they earned their knowledge legitimately and with integrity; and that they are members of the profession of nursing, prepared as competent, ethical clinicians who warrant the public’s trust.

As professional nurses and members of the faculty, there is a social and moral obligation to ensure that students uphold the ethical principles integral to our profession and public trust. The faculty need to be able to trust that students 1) come to class prepared, 2) are committed to maintaining integrity of the learning process, and 3) will respect the methods used to
evaluate student competencies. Our integrity as professional nurses mandates that we hold each other accountable. Likewise, as students, you have the same responsibility.

**UIC Academic Integrity Statement and Disciplinary Policy**

As an academic community, UIC is committed to providing an environment in which research, learning, and scholarship can flourish and in which all endeavors are guided by academic and professional integrity. All members of the campus community—students, staff, faculty, administrators—share the responsibility of ensuring that these standards are upheld so that such an environment exists. Instances of academic misconduct by students, and as defined herein, shall be handled pursuant to the [Student Disciplinary Policy](#).

Academic dishonesty includes, but is not limited to:

- **Cheating:** Either intentionally using or attempting to use unauthorized materials, information, people, or study aids in any academic exercise, or extending or receiving any kind of unauthorized assistance on any examination or assignment to or from another person.
- **Fabrication:** Unauthorized falsification, reproduction, lack of attribution, or invention of any information or citation in an academic exercise.
- **Facilitating Academic Dishonesty/Plagiarism:** Intentionally or knowingly representing the words or ideas of another as one’s own in any academic exercise.
- **Bribes, Favors, Threats:** Bribing or attempting to bribe, promising favors to or making threats against any person with the intention of affecting a record of a grade, grade, or evaluation of academic performance. Any conspiracy with another person who then takes or attempts to take action on behalf of or at the direction of the student.
- **Examination by Proxy:** Taking or attempting to take an exam for someone else is a violation by both the student enrolled in the course and the proxy or substitute.
- **Grade Tampering:** Any unauthorized attempt to change, actual change, or alteration of grades or any tampering with grades.
- **Non-original Works:** Submission or attempt to submit any written work authored, in whole or part, by someone other than the student.

**Compliance with the following specific rules is required:**

1. No student shall knowingly, without authorization, procure, provide, or accept any materials which contain questions or answers to any examination or assignment.
2. No student shall, without authorization, complete, in part or in total, any examination or assignment for another person.
3. No student shall, without authorization, allow any examination or assignment to be completed, in part or in total, by another person.
4. No student shall knowingly plagiarize or copy the work of another person and submit it as his or her own.
5. No student shall submit work that has been previously graded or is being submitted concurrently (self-plagiarism) to more than one course without authorization from the instructor(s) of the class(es) to which the student wishes to submit it.

Plagiarism is defined as any ideas or material taken from another source for either written or oral presentation that is not fully acknowledged (cited appropriately). Offering the work of someone else as one’s own is plagiarism and includes:

1. Submitting as one’s own a paper written by another person or by a commercial “ghost writing” service.
2. Exactly reproducing someone else’s words without identifying the works with quotation marks or by appropriate indentation, or without properly citing the quotation in a footnote or reference. The language or ideas taken from another may range from isolated formulas, sentences, or paragraphs to entire articles copied from books, periodicals, speeches, or the writing of other students.
3. Paraphrasing or summarizing someone else’s work without acknowledging the source with a footnote or reference.
4. Using facts, data, graphs, figures, or other information without acknowledging the source with a footnote or reference.

Collaboration

Some CON courses require students to complete work in small groups. Many courses encourage study groups. It is the responsibility of the student to determine from the faculty whether the final product (paper, exam, care plan, etc.) is to be an individual or group effort. When an individually completed final product is required, students will be subject to disciplinary procedures if more than that individual contributed to the final product. Examples of ground rules include:

1. Collaboration may be permitted in one class and forbidden in another because of different teaching/learning practices to achieve course objectives.
2. If working with others or receiving assistance is allowed, collaborative sources should be cited.
3. Students must follow the directions provided by the instructor and documented in the syllabus (assignment guidelines) and may only work together as instructed.
4. If directions are unclear about collaborating with their peers, students should seek clarification from the instructor before working together. Ignorance is not an excuse.
5. Even if collaboration is allowed, it is unacceptable to copy someone else’s work, take credit for the work of others (group work) or let others take credit for or copy a student's work.

6. If asked about whether students worked on an assignment together, faculty expect the truth.

**Student Affirmation Form**

The CON requires that all students are knowledgeable of and adhere to the academic integrity and professional conduct policies. All students are required to complete and sign the Student Affirmation Form (see Appendix B). Completed forms are submitted to the Office of Academic Programs.

**Course Evaluations**

The CON continuously monitors the quality of its educational programs. The evaluation process is complex and requires multiple inputs from both students and faculty to provide data necessary to ensure quality and integrity. Students will evaluate each course and faculty member at the end of every semester using an online system. Students will be notified when the online evaluations are available. The purpose of the course evaluations is to:

1. Elicit students’ feedback on course content and teaching effectiveness.
2. Provide information to faculty for consideration of course revisions.
3. Provide data for reports to accrediting bodies and other agencies.
4. Provide information for faculty promotion and tenure decisions.

Other evaluation components (such as evaluation of clinical practice sites) are done according to a planned schedule.

The course evaluation aggregate results are reviewed by faculty and administrators and are used to improve the CON courses and instruction. Students are therefore strongly encouraged to participate in the course evaluation process.

**Program Evaluation**

CON graduates also provide important input in program evaluations. Shortly after they graduate, alumni are asked to participate in the American Association of Colleges of Nursing / Benchmark (AACN/Benchmark) Nursing Exit Assessment. Alumni are also surveyed by the CON one year and five years post-graduation.
Data from these surveys along with other evaluations are used to inform the program assessment process. Student input is valuable and students' thoughtful consideration of the evaluation items is a vital component of the process. Please respond promptly when asked to participate in the evaluation process.

**Religious Holidays**

The faculty of UIC shall make every effort to avoid scheduling examinations or requiring that student projects be turned in or completed on religious holidays. Students who wish to observe their religious holidays shall notify the faculty member by the **tenth day** of the semester of the date when they will be absent unless the religious holiday is observed on or before the tenth day of the semester. In such cases the student shall notify the faculty member at least five days in advance of the date when he/she will be absent. The faculty member shall make every reasonable effort to honor the request, not penalize the student for missing the class, and, if an examination or project is due during the absence, give the student an exam or assignment equivalent to the one completed by those students in attendance. If the student feels aggrieved, he or she may request remedy through the campus grievance procedure. (Approved by the University of Illinois at Chicago Senate, May 25, 1988.)

**Practicum and Lab Policies and Procedures**

**Assignments**

Practicum placements for students in the **Chicago BSN and Graduate Entry MS programs** are assigned by the Office of Academic Programs. Any special or unique circumstances regarding practicum placements should be communicated to the student's advisor as soon as they are known. Advisors communicate these circumstances to the Assistant Director for Clinical Placements, or other designated personnel, for consideration. It is imperative that students submit their requests prior to the final assignments being communicated to the students. After final assignments have been communicated to students, no changes can be made. Coordinators work together to ensure that each student is exposed to a variety of practicum settings.

Students in the Urbana and Springfield BSN programs are assigned to a cohort upon admission and practicum assignments are made each semester by the faculty course coordinators.
Students in the Master's and DNP programs will receive information regarding practicum assignments from their program and/or course coordinators. Clinical placements are in the vicinity of Chicago and the regional campuses.

In all cases, a current, valid, signed affiliation agreement/contract between the UIC College of Nursing and the clinical agency **MUST** be in place before a student can begin any clinical practicum.

**Attendance**

Clinical Practicum and lab attendance per course is required. If a student anticipates having to miss clinical practicum or lab hours for any reason, the student must communicate this as soon as possible to the clinical practicum/lab instructor and to the Course Coordinator. Instructor and Coordinator will follow College of Nursing policy to determine if the absence is excused (approved religious holiday; unscheduled acute illness of student; death in family; any unforeseen, untimely crisis, which could not have been avoided) or unexcused. Students are required to provide evidence or documentation of an excused absence, as soon after the absence as possible, and no later than the next scheduled clinical practicum or lab session. Absences, whether excused or unexcused, will have an impact on student’s success in the course, up to and including failure of the course. Opportunities for making up missed clinical days or laboratory sessions are not available.

Students must attend all clinical practicum orientations for their assigned agency. Students who are not present for clinical practicum orientation, whether their absence is excused or unexcused, might not be allowed to continue in the course.

**Outcomes/Penalty for Missing Clinical Practicum and/or Lab Hours:**

After each excused absence per course, student’s ability to meet clinical competencies will be evaluated by course instructor. To pass a clinical practicum/lab course, student must meet all clinical practicum and lab competencies.

After two unexcused absences per course, student will be dismissed from the course.

**Practicum / Fieldwork / Off-Campus Employment Requirements for International Students**

Visa-sponsored students who will participate in training that is an integral part of their degree program, such as a clinical practicum, internship, fieldwork, and/or co-op, are required to
obtain visa-related authorization before beginning the training. For F-1 students, the authorization is called Curricular Practical Training (CPT). If the training is not part of the degree requirements, but is related to nursing, an F-1 student may qualify for pre-completion Optional Practical Training (OPT). For J-1 students, the authorization is called Academic Training (AT). NOTE: While the paperwork frequently refers to “employment,” this authorization is also required for almost all unpaid clinical practicums. Please consult with your academic advisor and the university’s Office for International Services.

**Ethics/Confidentiality**

All students are expected to adhere to the American Nurses Association Code of Ethics and to respect the confidentiality of all patient data and records. Students who violate this code will be subject to disciplinary action.

Students in the BSN and Graduate Entry MS programs will receive HIPAA (Health Insurance Portability and Accountability Act of 1996) training information at orientation. Students will be instructed to watch an online HIPAA training video on the “College of Nursing Compliance & Clinical Partner Requirements” page on Blackboard. Students are then required to read and complete the Acknowledgement of HIPAA Training Form. All other students must provide documentation of HIPAA training which can be a certificate or a letter of training completion from an employer. HIPAA training documentation should be submitted with immunization information to a student’s CastleBranch account.

The federal government’s Privacy Rule became effective April 14, 2003. The Privacy Rule provides the first comprehensive federal protection for the privacy of health information. The CON initiated the following course requirements to ensure privacy compliance for all CON students.

1. You will be required to sign a confidentiality statement before you access any patient information (paper, electronic and oral), and your instructor will keep copies on file.
2. You will be required to keep all patient information confidential.
3. Patient information will be discussed only in private areas (no elevator or cafeteria discussion).
4. You will not be allowed to take any patient information that is identifiable from the hospital/clinic.
5. You will be required to follow all hospital/clinic policies and procedures for patient privacy at your site of clinical placement.

Failure to protect patient health information is considered a federal offense, and failure to comply with this CON requirement may result in failure of the course and possible disciplinary action.
More information on HIPAA regulations can be found on the [Forms page on CON website](#).

**Mandatory Compliance Requirements**

These mandatory compliance requirements were developed in coordination with CDC guidelines for healthcare professionals in addition to guidelines set forth by our clinical partners to ensure student and patient safety. These mandatory clinical requirements are the same for ALL students regardless of degree and/or clinical practicum status and must be adhered to at all times. For additional information on mandatory compliance requirements, please refer to the “College of Nursing Compliance Requirements” page on [Blackboard](#).

Individual agencies may have further requirements. These requirements along with any required forms are available on the [CON Practicum Requirements website](#).

In all instances, students are financially responsible for the cost of the mandatory compliance requirements and should contact their insurance provider as soon as possible if they have questions about coverage or processes and procedures related to such coverage.

**Penalty for Student Non-Compliance**

Students will NOT be permitted in clinical practicum courses until ALL clinical and compliance requirements, except for the current flu season vaccination, are met and are current. Students who are not compliant will be placed on a “Compliance College Specific” hold until compliant and will be unable to register for any future courses until all outstanding compliance requirements are met.

Students who become non-compliant during a term will be immediately removed from all clinical sites and will not be eligible to return until fully compliant with all mandatory compliance requirements. Any clinical days missed as a result of non-compliance will be considered unexcused absences with no opportunity for making up the absence. Students may also be subject to other penalties outlined by the course faculty.

**Mandatory Compliance Requirements**

All students in the College of Nursing, regardless of degree and/or clinical practicum status, are required to have/meet the following:

- CastleBranch Medical Document Manager and Drug Screen package.
- CastleBranch Background Check package. *Background checks from other companies will not be accepted. Students must disclose any additional background check hits.*
  
  *The estimated cost is $52.00.*
- Positive Titers, Current Immunizations, and Annual TB Test
- Positive IGG titers [Measles, Mumps, Rubella (German Measles), and Varicella Zoster]
- Positive Hepatitis B Surface Antibody (AB) titer
- Negative QuantiFERON®-TB Gold test
- Tetanus and Diphtheria (TDAP) booster within past 10 years
- Current influenza vaccination

**Compliance Documentation**
- Current American Heart Association (AHA) BLS Provider CPR Certification.
- Current Driver’s License, State ID, or Passport.
- Current RN License (*Post-licensure students only*).
- HIPAA Training Certificate.
- CON Documents, including Handbook Acknowledgement, Student Affirmation Form, Confidentiality Agreement, and Consent to Release Education Records (FERPA).

*Mandatory compliance requirements are subject to change due to the demands of our clinical agencies.*

*Please note:* Students will be notified one time via the immunity@uic.edu email about their compliance status. Students also receive frequent renewal reminders from CastleBranch.

**CastleBranch Medical Document Manager**

All mandatory compliance documentation is to be submitted to and held by our online compliance vendor, CastleBranch. Students must purchase and register for their own medical document manager. Questions regarding initial set-up and subsequent issues must be directed to a CastleBranch Service Desk Representative at 888-723-4263.

Students must supply their own copy of medical documentation and keep the original copies for their own records. The Office of Academic Programs will NOT copy or re-furnish mandatory compliance documentation to students for their own records, for CastleBranch, or for third parties (e.g., employers). Documentation is collected for the sole purpose of monitoring mandatory compliance in accordance with hospital and public health requirements. Students must contact their healthcare providers or Student Health Services to obtain missing documentation.

**Exemption from Mandatory Compliance Requirements**

There are very few exemptions to the mandatory compliance requirements listed above. Students seeking an exemption from any mandatory clinical requirements should submit an Immunization Compliance Waiver Request form to the Office of Academic Programs. The
form includes substantive reasons for the request. Approval will be determined on a case-by-case basis. Documentation from a healthcare provider must be included with the request.

CastleBranch Drug Screen

A 10-panel urine drug screen is required upon admission for all students and must be done through CastleBranch. It may also be required again according to clinical site requirements. Students will be informed of that event as indicated.

CastleBranch Background Check

Domestic students are required to complete a background check prior to taking their first CON course. The online background check must be done through CastleBranch; background checks from other agencies will not be accepted. Once completed, the background check report is made available to both the student and the CON Associate Dean for Academic Affairs. Students should check their report for accuracy. The CON requires one initial report for each student; however, students must disclose any criminal convictions (i.e., misdemeanor and/or felonies) that occur while enrolled in the CON.

International students who are new to the U.S. are not required to have a background check for the first year. Students must contact the CON Global Health Leadership Office (11th floor, CON building) to complete the New International Student Background Check One Year Extension Request form. If granted, the extension expires one (1) year from the date of first entry into the U.S. on the current student visa.

Positive Titers, Current Immunizations, and Annual TB Test

Titer Requirements

Positive Measles (Rubeola), Mumps, and Rubella IgG Titers:

- Negative, Equivocal, or Not Determinable Titer Results: Series of 2 MMR (4 weeks apart) and a 2<sup>nd</sup> IgG titer will be required.*

Positive Hepatitis B Surface Antibody (AB) Titer or 3 Hepatitis B Immunizations within past 10 years

- Negative, Equivocal, or Not Determinable Titer Results: Series of 3 Hepatitis B boosters (2 boosters - 4 weeks apart) and 3<sup>rd</sup> booster (6 months after 1<sup>st</sup> booster) and a HB Surface Antibody titer will be required.*

Positive Varicella Zoster (Chicken Pox) IgG Titer
• Negative, Equivocal, or Not Determinate Titer Results: Series of 1-2 Varicella boosters (4 weeks apart) and a 2nd IGG titer will be required.*

Booster Series: Upload negative titer (in the place of positive titer) to your MyCB – Medical Document Manager to start booster series. Students in booster series are considered compliant as long as they upload their boosters and 2nd titer documentation to their MyCB – Medical Document Manager as soon as received.

Childhood vaccines: Do not upload childhood vaccines in place of positive titers. Childhood vaccines will be rejected.

Annual TB Test

- An initial negative QuantiFERON®-TB Gold is required. Subsequent annual tests can be a TST or QuantiFERON®-TB Gold test. For history positive TST or BCG vaccine, please refer to the “College of Nursing Compliance Requirements” course on Blackboard for further documentation requirements and the CON TB Questionnaire.

Compliance Documentation

Current American Heart Association (AHA) BLS Provider CPR Certification

All students must have current American Heart Association (AHA) BLS Provider CPR Certification. CPR certification expires two years from the date of issue and must be renewed prior to the expiration date. Basic CPR classes offered to non-medical individuals or non-AHA healthcare provider CPR courses (i.e., American Red Cross) are NOT acceptable.

Current Driver’s License, State ID, or Passport

Current RN License (Post-licensure students only).
Post-licensure students must submit a current, valid Registered Nursing license. All newly-admitted post-licensure students (MS [except graduate entry], DNP, PhD) must have a current, valid RN license to practice professional nursing in at least one political jurisdiction prior to taking ANY graduate/professional level nursing course. Newly-admitted students who do not have a current, valid RN license by the first day of classes will have their admission offer rescinded. A current, valid RN license from the State of Illinois is required for pre-licensure MS and DNP students prior to beginning the second semester of their programs. (Note: Students enrolled through the Quad Cities Regional Campus must have a current, valid
RN license from either the State of Illinois or the State of Iowa. Continuing students without a current, valid RN license from the State of Illinois (or Iowa, Quad Cities students only) will have a compliance hold placed on their UIC account and will not be allowed to register for classes.

Graduate entry students pursuing an advanced generalist MS degree will apply to take the NCLEX after graduation.

HIPAA Training Certificate

Knowledge of The Health Insurance Portability and Accountability Act (HIPAA) of 1996 is a requirement of all healthcare professionals. All incoming CON students must provide documentation of HIPAA training.

CON Documents
Handbook Acknowledgement, Student Affirmation Form, Confidentiality Agreement, and Consent to Release Education Records (FERPA).

Uniform Requirements

The CON has standard uniform requirements for all students (undergraduate and graduate) engaged in practicum learning experiences.

The purpose of this professional attire is to:

- Identify the person as a UIC CON student.
- Promote the safety of both the client and nursing student.
- Promote the development of trust by reducing barriers to the establishment of a therapeutic nurse-client relationship.

Proper Attire/Uniform for Clinical Practice

Professional appearance is important to the development of the image of nursing. Students need to look professional while participating in the clinical setting or any clinical course function. Students’ appearance becomes part of the healthcare environment. The clinical setting is not the place to express one’s individuality. Extreme jewelry can detract from a professional image. Similarly, the CON needs to be consistent with clinical agency policies.

The uniform requirements are:

All students:
- Name pin.
• Footwear as indicated by the clinical requirements. No colored marking on shoes. Regardless of clinical requirements, all footwear must be close-toed.
• All students need a watch with second hand and supply kit including stethoscope, blood pressure cuff, hemostat, penlight, and bandage scissors.
• Clothing should be neat, clean, in good repair and adequately pressed. Shoes should be cleaned and polished.

BSN and Graduate Entry MS students:
• V-neck scrub top with CON emblem, one pocket or two pockets. A white, short-sleeved T-shirt may be worn under scrub top, with sleeves not extending beyond sleeves of scrub top.
• Scrub pant, drawstring or elastic waist.
• White lab coat with the CON emblem on the left sleeve.

Students completing clinical experiences with the department of corrections:
• Polo shirts and dark trousers will usually be required
• Specific instruction will be provided by the course faculty

Students are required to purchase their uniforms and supply kits from a CON-designated vendor. Graduate students should adhere to the standard attire policy for their clinical placement. This includes a white lab coat with the CON emblem on the left sleeve.

**Non-Patient Care Lab or Practicum Experience:** When not giving direct patient care but engaged in learning activities, students are required to wear professionally-appropriate attire and their name pin. Jeans, shorts, sweat clothes and T-shirts are unacceptable. If at a practicum facility or engaged in assessment activities, lab coat with the CON emblem on the left sleeve and name pin should be worn over attire.

**Additional Requirements**

Nails: May not extend beyond the tip of the finger. Polish is NOT permitted.

Hair: Hair must be kept off the face and above the collar or pulled back. Natural color tones only. Sideburns, moustaches and beards must be neatly trimmed.

Body Art: Tattoos and/or other body art must be covered while in clinical settings.

Jewelry/Accessories: These are the ONLY acceptable accessories:
• One pair of stud earrings - one on each ear lobe
• One plain ring/ring set on one finger

No other body jewelry or accessories are acceptable

NOTE: In some practicum areas all jewelry must be removed.
Any exceptions to proper attire/uniform requirements will be noted by individual course instructors and individual practicum sites.

Transportation

Each student is responsible for his or her own transportation arrangements and costs for all practicum sites. These sites may be located some distance from the CON, and public transportation may not always be available. In NURS 361, Nursing Care of Populations (BSN), and at the community health sites as part of NUPR 416, Integrated Health Care: Clinical Practice II, students must present proof of valid driver's license and auto insurance at agency request. Students are not permitted to transport clients or other persons during clinical hours nor are faculty or host agency personnel permitted to transport students. Students must have access to a vehicle for each clinical day due to the nature of the clinical experience. The expectation is that students will each provide their own transportation as carpooling is generally not feasible.

Reportable Events

Reportable Event Policy

Reportable events during a clinical practicum experience are defined as nursing care errors, exposure to pathogens, patient injuries, violation of agency policy, accusations, threats or sudden student illness during the practicum (e.g., fainting, allergic reaction, injury). Those involved may include CON students, CON faculty, patients, or agency staff. The immediate response to the event will include adherence to agency policy for reporting and documenting the event and following post exposure policy, if applicable (see Occupational Exposures below). In addition, the faculty member will report the event to the course coordinator within 24 hours of the event. The course coordinator will report the event to the Associate Dean for Academic Affairs and the Regional Campus Director (if applicable) within 24-48 hours of the event. The faculty member will complete the Reportable Event Form and submit it in a sealed envelope to the Associate Dean for Academic Affairs within 3-5 business days of the event. The report will be maintained in a file in the Office of Academic Programs and protected from disclosure to the extent protected by law. The faculty member, course coordinator, and Associate Dean for Academic Affairs will review actions needed to prevent a similar event in the future within two (2) weeks of the event. Documented outcomes of these actions will be a component of the College’s program evaluation process.
Occupational Exposures

Exposures to blood or body fluids that occur as a result of needle sticks, cuts, splashes, or sprays that occur during clinical practicum experience could result in transmission of blood-borne diseases (such as Hepatitis B, Hepatitis C, or HIV). Care should be taken to ensure student and patient safety. In the event of an exposure, the following procedure is to be followed:

1. **Wash site immediately** and thoroughly with soap and water to remove any potentially infectious fluid and tissue. Flush mucous membranes with water.

2. **Report exposure to the appropriate authorities** at the practicum site and UIC faculty.

3. **Complete an immediate clinical evaluation, within a two hour window**, which should include drawing of blood samples from both the patient and the student. Possible therapies may include: antibiotics, Hepatitis B vaccine, Hepatitis B Immune Globulin, or antiretroviral therapy.

4. **Post-exposure care**: Students should access care at the site where the exposure occurred by following the post-exposure plan of the agency, the nearest student health care provider (i.e., in Chicago students utilize UIIHSS), or at the nearest ER. For distant sites, there may be substantial advantages to receiving evaluation and treatment on-site: immediate access; ease in handling source blood; faster test results; and on-site follow-up care.

5. **Follow-up of post-exposure care**: Students should follow-up within a week at the facility where care was received to confirm that all blood tests have been reviewed and that appropriate treatment is in place. Additional follow-up may be required; students must follow the advice of the health care provider.

**Payment for post-exposure care**

In all instances, students are financially responsible for the cost of post-exposure care and should contact their insurance provider as soon as possible if they have questions about coverage for post-exposure care or processes and procedures related to such coverage.

For students with **Campus Care insurance**, the student **MUST call Campus Care at 312-996-4915** within 24 hours to report the incident. Failure to contact Campus Care in a timely manner could result in nonpayment for services.

**Medical Advice**

If a student is in need of medical advice related to post-exposure care, the student may contact the student health care provider at their campus (for example, in Chicago, the Family Medicine Center located at 722 West Maxwell Street, 2nd Floor, Chicago (312-996-2901)).
Reporting

Students should follow the Reportable Event policy and procedures as listed above. A sample of the UIC CON Reportable Event form can be found in Appendix C. A fillable document is available at the CON web site.

Maternity Policy

The CON places no limitations upon how long students may be enrolled when pregnant, provided that they remain able to fulfill their academic responsibilities. Students should be aware of the policies of the affiliated agencies to which they are assigned that may prohibit their assignment there. Prior to the beginning of each semester, and preferably at the time of registration, it is essential that students who are pregnant contact their advisor. The advisor will review with each student the practicum assignment for the coming semester and will assist the student in arranging whatever accommodations may be appropriate because of the pregnancy, such as an altered program or a leave of absence.

The following information should be uploaded to the compliance tracker:

1. Name and address of physician.
2. Expected date of delivery.
3. Name and phone number of individual(s) to be contacted in case of emergency.
4. A letter from the physician or nurse midwife stating that the student's health status will not be jeopardized by enrollment in the practicum.

Alcohol and Controlled Substances

The improper and/or illegal use of controlled substances, including alcohol, can seriously injure the health of students, impair their performance of their responsibilities, and endanger the safety and well-being of fellow students and members of the general public. Students who are engaged in clinical work at a practicum site may be required to submit to random tests for illegal use of controlled substances as provided by the law or regulations of the contracting agency. Just cause for student disciplinary action includes, but is not limited to, use or unauthorized possession of intoxicants, controlled or illegal substances, or materials dangerous to public health or safety. It is not acceptable to use alcohol or illegal drugs prior to or during class or practicum. Immediate disciplinary action will occur.

Unsafe Practicum Performance

A student who demonstrates unsafe nursing practice which jeopardizes the client’s or family's physical or emotional welfare may be dismissed at any time from the practicum area. Unsafe practicum practice is defined as any behavior determined by faculty (or RN mentor or
preceptor) to be actually or potentially detrimental to the client or to the healthcare agency. Unsafe practicum practice can include behaviors related to physical or mental health problems; use of alcohol, drugs or chemicals; lack of preparation for practicum; or deficits in problem-solving skills.

**Procedure for Response to Unsafe Practices, Behaviors, or Abilities of Student(s)**

The UIC College of Nursing (UIC CON) reserves the right to temporarily remove a student from any and all academic and clinical activities if a student’s behavior raises concern for the safety of the student or others.

The UIC CON expects all faculty, staff, and students to report behavior that threatens the student’s safety or the safety of others. Such behavior includes, but is not limited to, unacceptable patient management, patient endangerment, inappropriate alteration of patient records, behavior that poses a danger to persons (the student him/herself or others), behavior that involves damage to property, an ongoing threat to or disruption of the academic process or environment, and acts of violence or sexual misconduct.

The UIC CON also expects all faculty, staff, and students to report incidents of behavior that raise concerns about impairment or inability to function or behave appropriately in educational or clinical settings (e.g., drug and alcohol use and/or erratic behavior which puts the student or others at risk).

Faculty, staff, and students are urged to call the police to report any events involving acts or threats of violence, urgent safety concerns, possession of weapons on campus, imminent threats of suicide, and medical emergencies.

Reports of behavior that threatens safety, indicates impaired functioning, or does not meet technical standards should be directed to the Designated Academic Officer via completion of the [Reporting Guidelines for Unsafe Practices form](#).

The Designated Academic Officer will review reports of behavior that threatens the safety or raises concerns about impaired functioning upon receipt. After the review, the Designated Academic Officer may remove the student temporarily from any or all academic and clinical settings. By the end of the next business day following that removal, or as soon as practical, the Designated Academic Officer will schedule meetings with the student in question, the person who made the report, and others who may provide relevant information. The Designated Academic Officer will advise the student that failure to meet as requested may delay or prevent the student from returning to campus unless and until the meeting can take place or there is a resolution of the incident or concern.

After holding the relevant meetings, the Designated Academic Officer will make one of the following findings.
• **Finding of No Evident Problem.** If the Designated Academic Officer finds that the report is unsubstantiated or that the student’s behavior does not, in fact, meet the standards set above for temporary removal, the Designated Academic Officer will return the student to his/her academic and clinical activities.

• **Finding of a Significant Problem.** If the Designated Academic Officer finds that behavior described in the report poses a threat to the health or safety of the student or others, the Designated Academic Officer may take any or all of the following actions:
  
  o Refer the student for a Fitness for Participation evaluation* consistent with the protocol appended hereto;
  
  o Seek temporary or permanent removal of the student from the campus by following the procedures outlined in the UIC Disciplinary Procedures for Emergency Suspension or Involuntary Withdrawal;
  
  o Report the behavior to the UIC Student Response Team;
  
  o Pursue a non-emergency disciplinary complaint against the Student to address the behavior.

*When a student has been referred for a Fitness for Participation Evaluation, the Designated Academic Officer will notify the student that the suspension from all student academic and clinical activities will remain in effect until such time as the student is returned to the program following a Fitness for Participation Evaluation.

Students who decline to secure a required evaluation are subject to action up to and including dismissal through the University Student Disciplinary Policy.

Students are advised that temporary removal from the course(s) under this policy may result in a delay in the student’s progress toward graduation.

In reviewing reports regarding student behavior, the Designated Academic Officer may at all times refer the student for disciplinary action, according to UIC CON and University policies.

**College of Nursing—Fitness for Participation Policy & Process**

Every Student enrolled in the UIC College of Nursing is expected to participate and perform the functions of a nursing student in a fit and safe manner, consistent with the academic, professional, and safety/technical standards and expectations of the program. Students must be able to perform and participate in academic and clinical activities in a safe, secure, competent and effective manner. Students who are not fit for these activities may present a safety hazard to themselves, to other students/employees, to patients, to the University community and to others. Those students may be referred for a Fitness for Participation evaluation before being allowed to return to their participation in the program.
Fitness for Participation Evaluations will be performed by a healthcare provider at the University Health Services, or a healthcare provider at the relevant site that has been designated/approved by UHS, in order to determine the student’s fitness to participate in and perform academic and clinical activities of the program. UIC reserves the right to require students to undergo psychological/psychiatric evaluation and treatment, as well as tests for illegal drugs or alcohol as part of the Fitness for Participation process. Students who refuse to comply with recommended evaluations may be subject to disciplinary or academic action, up to an including dismissal.

Once the student participates in the fitness exam, UHS or the designated healthcare professional will assess the student’s fitness to return to the Nursing Program based upon the information obtained from the evaluation and the requirements of the Program. UHS or the designated healthcare professional will communicate that assessment to the student and to the Designated Academic Officer. Students who are deemed unfit to return to the program for an extended period of time may be required to repeat some or all of the academic/clinical requirements necessary for graduation.

For those students who are returned to the course(s) or put on leave of absence, the Designated Academic Officer will monitor the situation to ensure the student’s compliance with any conditions placed on his/her return or absence, and the College's compliance with any reasonable accommodations established through this process.

Liability Insurance

The University of Illinois maintains a general and professional liability insurance self-insurance program, subject to limits, conditions, and exclusions. As a general rule, students participating in practicum experiences are covered under the University of Illinois insurance program, although there may be some exceptions. The University executes contracts with learning sites delineating the responsibilities of all parties including professional liability and clinical oversight. If there is a situation when the University does not provide general or professional liability insurance for a practicum course the student will be told so arrangements can be made to secure the coverage in another way.

In every instance, students must be registered in the practicum course to be covered by liability insurance. Newly admitted students may not begin a practicum experience before the first day of enrollment (i.e., the first day of their first semester). With prior approval, continuing students may participate in practicum experiences between semesters provided that: 1) the prior semester has ended; 2) the student is registered for the practicum course; and 3) the faculty of record for the course is available to supervise the student. Insurance coverage is contingent upon the student working within the scope of the practicum agreement. Activities the student may be asked to do (or want to do) that are not within the
scope of the practicum agreement could jeopardize insurance coverage. Clinical activities for pay are never covered by the University’s insurance.

**International Students**

As part of the university admissions process, international students are defined as applicants that are “Current holders of any type of visa or those who would need a visa to study in the US.” For the purposes of this handbook, guidelines for international students are referring specifically to F-1 and/or J-1 Student Visa holders only. All other visa holders should check with university’s Office for International Services for visa-specific guidelines. Please refer to ois.uic.edu for additional details and forms related to international student regulations. International students whose program of study requires them to have a current, valid RN license from the State of Illinois can find information on obtaining an Illinois RN license on the Illinois Department of Financial and Professional Regulation website.

**Important Information for F-1 and/or J-1 Student Visa holders**

Always maintain full-time enrollment during the Fall and Spring semesters. Full time at UIC means:

<table>
<thead>
<tr>
<th>Credit Hours</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>8 credit hours</td>
<td>MS and PhD students, excluding professional programs, who are awarded a 50% assistantship <em>(please note that graduate students need to register for 9 credit hours to be eligible for the CTA Ventra U-Pass Card. You may refer to the Graduate College Website for more information on registration.)</em></td>
</tr>
<tr>
<td>9 credit hours</td>
<td>All other graduate students</td>
</tr>
<tr>
<td>12 credit hours</td>
<td>All BSN and DNP students, and students who are awarded a fellowship or Graduate College tuition and service-fee waiver (without an assistantship)</td>
</tr>
</tbody>
</table>

**Enrollment During the Summer Session:**

Registration for the Summer semester is not required for international students who are continuing their program and have registered the following Fall semester. *Students on 12 month programs must be registered for all 12 months.* Students who will *complete* their program in summer must be registered for summer. International Students who *begin* their program in the Summer semester must register for a full-course of study, which is 5 credit hours (MS and PhD) or 6 credits (BSN and DNP).
Online Courses:

International students with F-1 and J-1 visas must be careful when enrolling for online courses as each visa category carries limitations on online course enrollment as it relates to the full-time enrollment requirement.

F-1 students may only count one online course (up to 3 credits) toward their full-time enrollment requirement. J-1 students may not count any online courses toward their full-time enrollment requirement. If a student only needs one course to finish their program of study, it cannot be taken through online or distance education. There must be a physical presence requirement during the final term of study. F-1 and J-1 students may take additional online courses during the semester once the full-time enrollment requirement is met.

Students with government sponsorship may be subject to additional limitations on online course enrollment as per the terms of their funding agreement. Such students are encouraged to consult with their sponsoring organizations directly.

To determine if a specific course is categorized as online, face-to-face, or blended, please check the online Schedule of Classes. You will need to confirm that the section you are registering for meets your requirements – sections within a courses with multiple sections may each be categorized differently. For the purposes of this requirement, “face-to-face” and “blended” courses are counted in the same category.

- Example = Grad Student on F-1 visa full-time with a 40% assistantship @ 9 credits
  - 2 in-person classes (6 cr) + 1 online class (3 cr) = ok!
  - 2 in-person classes (6 cr) + 2 online classes (6 cr) = ok!
  - 2 in-person classes (5 cr) + 1 online class (4 cr) = NOT ok

Final Semester of Study:
Students can register for less than full time only during their last semester. A student will need to provide a letter to the Office of International Services from their academic advisor verifying that it is their last semester.

Exceptions to Full-Time Enrollment:
Under limited circumstances, students may be authorized by OIS to reduce their course load based on certain academic and/or medical reasons. If a student is experiencing academic difficulties or a medical condition that requires them to drop below full-time, consult with an OIS advisor immediately. F-1 and J-1 international students must obtain prior authorization from OIS before dropping below full-time.
Accommodation for Students with Disabilities

The Disability Resource Center works to ensure the accessibility of UIC programs, classes, and services to students with disabilities. Services are available for students who have documented disabilities, vision or hearing impairments, and/or emotional or physical disabilities. Students requesting an accommodation and further information about disability resources should contact the Disability Resource Center at (312) 413-2183 (voice) or (773) 649-4535 (video phone) or visit their website.

Students requesting accommodation for disabilities should contact the Disability Resource Center preferably six (6) weeks before the semester, or immediately following diagnosis of a disability, to register or discuss their accommodation needs. Students with disabilities are required to provide documentation of their disability and how it may limit their participation in courses, programs, services, activities and facilities of UIC.

No accommodations can be made until the student's situation is evaluated by the UIC Disability Resource Center.

Student Resources

Student Success Program

The CON offers a Student Success Program at no cost to the student through the Clinical Learning Resource Center (CLRC). Peer Tutors provide support in learning course content as well as general study skills and test taking skills. Tutors are able to assist in most BSN, MS, and DNP courses. Tutoring is intended as an adjunct to independent studying and not a replacement. Thus, students should come with questions prepared or specific topics in which they need assistance. Requests for a peer tutor may be placed through this link: https://www.nursing.uic.edu/content/tutoring-request

Library Resources

The UIC University Library consists of the Richard J. Daley Library and the Library of the Health Sciences (LHS). The LHS has five sites (Chicago, Peoria, Rockford, Springfield, and Urbana) and serves the College in each location, providing collections for students, faculty, clinicians, and researchers. In addition to the electronic resources available through the UIC Library, students and faculty at the Quad Cities regional campus also have access to librarian services and on-site resource materials at the Trinity Medical Center library.

The University Library liaison to the CON is available for assistance with the following:
• Building the Nursing Collection: Students and faculty are encouraged to let the liaison know of particular books or journals the library should have or if there should be more books on a particular topic.
• Database Searching: Students can sign up for an appointment to learn the best databases and search strategies to use for their projects.
• Getting to Know the Library Website: Learn how to search in the catalog, find articles online and in print, and what to do if the library does not have what you need.
• RefWorks: Learn how to export citations into your paper and how to format your bibliography in APA format through RefWorks.

The library liaison, Rebecca Raszewski, can be contacted at:
Email: raspwr1@uic.edu
Phone: 312-996-2759

My.UIC

my.UIC is the University of Illinois at Chicago portal, developed for incoming and current UIC students as an information resource. At this time, it has the following features:
• Home Tab – A customizable page that allows a student to add information about their college, access their email, etc.
• Academics Tab – Registration, records, and class information
• Finances Tab – Financial aid and student account information
• Campus Life Tab – Campus resources and services information

Student Legal Services
UIC’s Student Legal Services (SLS) is a full-service law office dedicated to providing legal solutions for currently enrolled students. SLS offers advice and representation on a wide variety of legal matters, including:
• Landlord-Tenant Matters
• Expungement of Records
• Family Law
• Some Criminal Matters
• Traffic Issues
• Orders of Protection
• Employment Agreements

U and I Care Program
The U and I Care program provides a network of care for UIC students and centralizes campus information and resources related to student advocacy efforts through three components: a website containing resource and referral information, educational outreach
activities and services, and U and I Care Partners. For more information and resources, please visit go.uic.edu/uicare.

If you have any questions or want more information about services, feel free to visit the Dean of Students website (dos.uic.edu), contact us at 312-996-4857, or visit their office in the Student Services Building Suite 3030.

Other Resources

An up-to-date list of campus resources can be found on the College website. Students who are in need of academic or other assistance are encouraged to talk to their advisor and/or the Office of Academic Programs staff regarding available resources.

Computer and Technology Requirements and Policies

NetIDs
A UIC network ID, or netID, is a public identifier used for authentication to many services provided by the Academic Computing and Communications Center (ACCC) such as “logging in” to a service. The netID is not a password and it is not an account itself but it is required in order to access ACCC services.

Student netIDs are automatically assigned when a student is admitted to UIC. A UIC netID will not be assigned until university admission takes place. When your university admission process begins, you may activate your netID.

E-mail Accounts

The primary method of communication at the CON is e-mail, and students are encouraged to communicate with their advisors and instructors in this manner.

As part of setting up your university netID, you will create a university email account, typically Basic Email (on Mailserv and accessed via Webmail) or Gmail (via a GoogleApps@UIC account). Your netID should forward to one of these university email accounts – once setup, yourNetID@uic.edu will forward to that account.

Students are expected to use their university email accounts for all school-related communications; it is important that this account is checked on a regular basis. The CON will only send messages to a student’s UIC e-mail address. Students can check their UIC email at the UIC Webmail site (webmail.uic.edu) or the UIC GoogleApps site (gmail.uic.edu). Please include your first and last names and UIN in all email communications with UIC faculty and staff.
All students are added to either the CON-UNDERGRAD or CON-GRAD listserv. The listservs are used to communicate important information regarding course registration and deadlines, course evaluations, practicum assignments, scholarships, special events, and RA/TA positions. It is important that students check their e-mail on a consistent basis to stay informed.

**Email Etiquette**

When you are writing a message to a staff or faculty member, it is important to present a professional image and effectively communicate your message. Following these basic tips will help you accomplish this goal.

**Use proper spelling, grammar, & punctuation.** This is not only important because careless spelling, grammar, and punctuation give a bad impression of you as a student, it is also important for conveying the message properly. Please also limit the use of abbreviations such as BTW (by the way) and LOL (laugh out loud). The recipient may not be aware of the meanings and abbreviations and in professional emails, they are not generally appropriate.

**Do not write in CAPITALS. IF YOU WRITE IN CAPITALS, IT MAY BE INTERPRETED AS SHOUTING OR CREATING EMPHASIS.** This can be seen as annoying or rude and may impact the quality of the response you receive.

**Keep the message thread.** When you reply to an email, please include the original mail in your reply. Faculty and staff receive many emails each day from current and prospective students, as well as other staff and faculty, and an individual discussion might be lost among the other emails. Keeping the message thread intact will allow the responder to give your email context and respond appropriately.

**Be concise.** Do not make an e-mail longer than it needs to be. Remember that reading an e-mail is harder than reading printed communications. An intended meaning may be lost or misinterpreted in a long e-mail.

**Technology Requirements**

**Computing Requirements**

A portion of all programs at the CON are delivered online. Every program has courses that are offered entirely online as well as courses that are considered hybrid or blended (e.g., combining online and traditional face-to-face interactions). All students admitted to the CON must have ongoing access to a personal computer meeting the following minimum specifications:

- Processor: 2.0 GHz or faster
- RAM (Random Access Memory): 8 GB or more
• Hard Drive: 256 GB hard disk drive, with a minimum of 80 GB available.
• Optical Disk Drive (CD/DVD)
• 2 (or more) 2.0 or 3.0 USB ports
• Video Card: with 1MB Video RAM, or better
• Monitor: Capable of 1366 x768 (or higher) resolution
• Sound card, speakers and microphone OR a headset (including microphone)
• Webcam
• Operating System: Windows 7 or higher; Mac OS
• Flash drives are not recommended, but a USB flash drive (2 GB or larger) may be used in order to transport files from home to school and vice versa. MS Office (available from the UIC Bookstore) – check http://webstore.illinois.edu for student discounts
• Adobe Reader (available at http://get.adobe.com/reader/)
• Adobe Shockwave Player (available at http://get.adobe.com/shockwave/)
• Adobe Flash Player (available at http://get.adobe.com/flashplayer/)

Note: Apple Macintosh computers are not recommended. The CON does not have the IT expertise to support the use of Macs and they are often incompatible with the software required by some programs.

Blackboard

Many courses at the CON utilize the Blackboard learning platform. Students who have not taken an online course before or who need to become familiar with the Blackboard platform are strongly encouraged to review the Blackboard Experience course. Log into Blackboard and click on the Student Resources Tab (link works when already signed in to Blackboard).

Additional Technology Requirements

Some programs may require the purchase and use of additional technology such as on-line textbooks and resources, point-of-care software for mobile devices, and laptops for use in the classroom. Further information on these requirements will be provided at student orientation or by course instructors as appropriate.

Technology Etiquette

• During clinical experiences and classes, cell phones may not be used at any time for personal phone calls or checking personal email/text messages and must be turned off or silenced.
• Text messaging during class is inappropriate. It is distracting to other students and faculty and interferes with learning.
• Students who bring laptops to class are expected to use them for educational purposes. The sound should be turned off prior to the beginning of class. Playing games, checking...
email, accessing social media and other similar uses of laptops and/or smart phones is unacceptable as they are barriers to learning

- Students may only access a patient’s health information that pertains to nursing care.
- Students may not store protected identifiable patient data into personal digital devices nor copy paper or electronic patient health records.
- Students may not take photos at any clinical site, including photos of clients, preceptors, or fellow students.

Social Media

- Internet social media networks, such as Facebook, YouTube, Myspace, LinkedIn, Twitter, and others promote connections with friends and family. However, students have responsibilities when posting in social networks, even if they are personal and private.
- Postings by students on their profiles, groups, chat rooms, and communications with others are in the public domain and accessible to reporters, parents, faculty members, law enforcement, predators, potential employers, and graduate school admissions officers. Postings are immediately searchable and may be forwarded, copied and archived. Anonymous comments may be traced back to your IP address. Search engines may detect deleted and cached posts years after publication.
- University email addresses should not be used in conjunction with unofficial or personal social media accounts and profiles.
- Students must present a professional and positive image of the profession, the CON, and themselves. Students have rights of freedom of speech, expression and association, including their right to use internet social networks. However, students must also respect the rights of patients, faculty members, and other students. Students are expected to monitor their own internet use and only post statements and images that appropriately represent to the public themselves, the CON, and the profession.
- Students should not initiate or accept “friend” requests from patients or faculty.
- The CON reserves the right to investigate and take disciplinary action against any student whose posting of material on an internet site violates University policies, CON policies or the Honor Code, HIPAA, or state or federal statutes. Students are prohibited from posting any patient information including patient images on any Social Media Site. Internet postings that violate these principles include, but are not limited to, sharing patient information or images, confidential information, images or language that represent partial or total nudity, sexual activity or misconduct, underage alcohol consumption, illegal acts, use of illegal drugs or other controlled substances, hazing activities, tobacco use, obscene gestures, or cheating. Also prohibited is posting any information about peers, faculty or other professionals, or clinical agencies that may be interpreted as insulting, derogatory, negative, or construed as “bullying.”
Students have a responsibility to review and monitor internet sites where they have posted to prevent personal or professional damage to themselves, other students, the CON, and the profession of nursing.

For reasons of safety and privacy, students are advised to refrain from posting personally identifiable information such as telephone number, address, class schedule, and places frequented. Students should check tagged photos and monitor electronic photo albums to avoid posted photos that would be considered inappropriate.

Computer Labs

On the Chicago campus, university computer labs can be found at different locations around campus; the closest lab is located in the Benjamin Goldberg Research Center, directly south of the CON on Taylor Street. Please refer to the Academic Computing and Communications Center (ACCC) website for computer lab locations and hours. The CON also has a computer lab available on the 11th floor for graduate student only. Students at the regional sites should check with their regional office regarding computer lab facilities and guidelines.

Registration and Enrollment

Students should refer to their respective university catalog (Undergraduate or Graduate) for university policies and procedures concerning registration, enrollment, and tuition and fees. In addition, the UIC Office of Admissions and Records website publishes up-to-date information concerning registration and calendars.

Course Rubric and Numbering

- All UIC courses are assigned a Course Rubric and a Course Number. Generally, courses numbered 100-399 are considered to be undergraduate classes; 400-499 are Masters courses; and 500-599 are doctorate courses. Courses offered in colleges other than CON may have differing guidelines – please check the Course Catalog and Schedule of Classes for registration restrictions for the specific course. Course Rubrics for CON courses are as follows:
  - NUEL = Nursing Elective Classes
  - NUPR = Nursing Practicum Classes
  - NURS = Nursing Core Classes
  - NUSP = Nursing Specialty Classes
Academic Load - Undergraduate

To be considered full-time during the Fall and Spring terms, an undergraduate student must be enrolled in a minimum of 12 semester hours. During the regular academic year, an academic course load exceeding 18 semester hours must be approved in the CON Office of Academic Programs.

Academic Load - Graduate & Professional

Graduate (MS, PhD) and professional (DNP) students who can devote full attention to their studies usually enroll for 9 to 12 semester hours each term. The Graduate College at UIC has defined full-time graduate student enrollment as 9 hours each fall and spring term and 5 hours in the summer for MS and PhD students. Half-time is defined as 5 hours each fall and spring term and 3 hours in summer. Full-time status for DNP students is 12 hours in the fall and spring semesters and 6 hours in the summer.

Important notes to this general definition:

- **International Students:** See section on “International Students” on page 35.
- **Fellowship Holders:** Must register for at least 12 hours of credit per semester of award (summer registration optional but if the tuition-and-service-fee-waiver is used a minimum of 6 hours is necessary).
- **Tuition-and-Service-Fee-Waiver Holders:** Must register for at least 12 hours of credit per semester of award (6 in summer).
- **Assistantship Holders:** Must register for at least 8 hours of credit each semester, excluding summer. While summer enrollment is optional, assistants who wish to use their summer tuition and service fee waivers must register for at least 3 hours during that term. Some graduate programs may require registration for more than 8 hours per term and/or summer registration. There are no tuition and service-fee waiver benefits for students employed with less than 25% or more than 67% appointment. Assistants who qualify for a Spring tuition and service fee waiver automatically receive a summer waiver if registered in at least 3 hours in summer and do not have an assistantship appointment in the summer. If an assistant has a summer appointment a waiver is granted for registration in at least 3 hours with appointments of 25% - 67%. See Assistantships for more information.

Note that 8 hours of registration (fall and spring) with an assistantship will satisfy the requirements of the assistantship and waiver, but will not qualify as being full-time. 9 or more hours of registration is considered full time, with or without an assistantship.
Registering for Courses

An advising hold is placed on all student records each registration period. Students are required to meet with their advisor before registering for courses. The hold will generally be removed within five business days after the student has met with their advisor and had their program plan approved; extenuating circumstances may cause a delay in the removal of an advising hold.

Registration permits are required for most courses. Permits are issued automatically only for those courses indicated on students’ program plans. Students will NOT be issued permits/approval to register for any course for which they have not successfully completed all prerequisite courses (even if listed on their program plans). Because the permits will be issued based on the information contained on students’ program plans, it is extremely important that all program plans be up-to-date.

The CON may also place a hold on a student’s record if the student has not completed all pre-registration requirements (for example, if the student’s compliance records are not complete, or if the College does not have a copy of the student’s current nursing license). The University may also place holds on a student’s record (e.g., compliance, financial). It is the student’s responsibility to clear all holds prior to the registration period. See the Office of Admissions and Records website for more information about holds.

- **Advising Hold:** schedule an advising appointment with your academic advisor.
- **Financial Hold:** resolve any outstanding financial obligations with Accounts Receivable.
- **Compliance Hold:** submit compliance documentation to the Student Compliance Coordinator.
- **International Student Hold:** complete check-in with the university’s Office for International Services.

Adding/Dropping Courses

Students may not add/drop a course after the tenth day of instruction in the fall and spring semesters, the second day of instruction in Summer Session 1, or the fifth day of instruction in Summer Session 2, without completing a form or petition within the CON.

Undergraduate students

- For course adds/drops/revisions after the University deadline, undergraduate students must complete an Undergraduate Student Petition Form and Registration Revision form and submit to their advisor and the Office of Academic Programs for approval by the Associate Dean for Academic Affairs.
• An undergraduate petition to drop a course will only be approved once during the student’s program.

Graduates Students (MSN, PhD, Non-Degree)

• For course adds/drops between the eleventh day of instruction and the last day of the tenth week of instruction (fifth week in Summer Session 1 & 2), graduate students must complete the Graduate Registration Revision Form.

• For course adds/drops following the tenth week of instruction (fifth week in Summer Session 1 & 2) through the last business day prior to the designated final exam period, graduate students must complete a Graduate College Registration Revision Form and the Graduate Student Petition, available in hard copy triplicate format in the Office of Academic Programs and the regional offices. Course changes made after the tenth week (fifth week in summer session 1 and 2) are subject to approval by the Associate Dean for Academic Affairs.

DNP Students

• For course adds/drops between the eleventh day of instruction and the last day of the tenth week of instruction (fifth week in Summer Session 1 & 2), DNP students must complete the Graduate Registration Revision Form.

• For course adds/drops following the tenth week of instruction (fifth week in Summer Session 1 & 2) through the last business day prior to the designated final exam period, DNP students must complete the Graduate Registration Revision Form, as well as the DNP Student Petition and submit both to the Office of Academic Programs. Permission to add/drop following the tenth week of instruction (fifth week in Summer Session 1 & 2) is subject to approval by the Associate Dean for Academic Affairs.

Transfer Credit

Limits on Transfer Credit

Maximum Allowed Transfer Credit. No more than 25 percent of the hours required for a master’s degree requiring 32-47 hours of credit (except up to 12 hours from UIC non-degree coursework), and no more than 50 percent of the hours required for a master’s degree requiring 48 or more hours of credit, can be transferred for degree credit. Doctoral students may transfer in no more than 25 percent of the hours required for the degree. This limit is for courses taken as a student in another college at UIC or another institution, but not course work taken in a different program within the Graduate College at UIC.
Transfer credit for MS, DNP, and PhD students is accepted only for courses in which the student received a grade of A or B and the course was not credited towards a prior earned degree. Credit earned more than six calendar years before admission to the Graduate College is not usually accepted for transfer. Undergraduate student transfer credits is governed by the UIC Registrar.

Non-degree Credit. Non-degree students who are admitted as degree candidates may, by petition, transfer up to 12 semester hours of graduate-level courses in which grades of A or B were earned. This does not count towards the limits of transfer credit listed above.

Procedures
A Graduate Petition for Transfer Credit toward an Advanced Degree is required for all transfers of credit except the 32 hours of credit for a prior master’s degree (see below). IMPORTANT: A transfer of credit petition should be completed with the advisor when the student develops their program plan. The petition is available from the Office of Academic Programs.

Students must attach to the petition an original transcript showing grades if courses were not taken at UIC, and a certification from the registrar or college dean of the applicable institution stating that the courses are graduate level and were not used toward fulfillment of the requirements for a degree if not self-evident from the transcript itself. A detailed course syllabus must also accompany the petition if the course was taken outside of UIC. It can take from 4-6 weeks for the petition to be reviewed and a decision made. The specific number of credit hours accepted for transfer is determined on an individual basis. No transfer is automatic.

Credit for Prior Master’s Degree
If approved by the CON and the Graduate College at the time of admission, PhD students with a previous master’s degree may be granted up to 32 credit hours. DNP students with a previous master’s degree admitted to the CON prior to 2014 may be granted up to 45 credit hours. The hours are subtracted from the total hours required for the doctorate from the baccalaureate. The hours are not counted toward the maximum allowed transfer credit limit. A petition is not required to receive this credit. DNP students who are admitted after 2014 who hold a specialty master’s degree must complete a minimum of 39 credits. Additional credits may be required depending on the selected program of study.
Waiving a Course

Students wishing to receive a waiver for a specific degree requirement based on prior coursework should first meet with their advisor to determine which, if any, courses may be waived. To request a waiver, the student and advisor should complete a petition (available from the Office of Academic Programs) and attach a detailed course syllabus and a copy of the transcript (if the course was taken outside of UIC) indicating when the course was taken and the grade and credit received. A separate petition must be completed for each course waiver requested. All petitions are subject to the approval of the Associate Dean for Academic Affairs. The decision will be based on the content of the course, when the course was taken, and the student’s performance in the course. It can take from 4-6 weeks for the petition to be reviewed and a decision made. If a waiver is granted, the student is still required to complete the total credit hours required for graduation and should work with their advisor to select an appropriate substitution.

Adding a Second Program

Currently enrolled graduate students who wish to add a certificate or concentration must submit a Request for Change of Graduate Program form, available in the Office of Academic Programs.

Changing from Non-degree to Degree

Non-degree graduate students interested in changing to degree status must submit a new UIC Application. See the Transfer Credit section of this handbook for information on transferring credit earned as a non-degree student to a degree program.

Leave of Absence

Except for international students whose visas require continuous registration, and doctoral students who have passed their preliminary exams, graduate degree-seeking students may take one semester (fall or spring) plus the summer session off without formal leave approval from the Graduate College (MS, PhD) or the CON (DNP). Degree students who desire to take an additional consecutive semester off, for a total maximum of three consecutive terms, must file a Graduate Petition for Leave of Absence as soon as possible and no later than the tenth day of the term for which leave is requested to begin. Non-degree students (including Certificate programs) are not eligible for a leave of absence. Petition forms may be obtained from the Office of Academic Programs and must be approved by the student’s advisor and the Associate Dean for Academic Affairs.

International students who hold an F-1 or J-1 visa must register each fall and spring semester due to visa requirements. Such students must file a Graduate Petition for Leave of Absence.
for any fall or spring semester they wish to take off, obtaining written authorization on the petition from the Office of International Services. If remaining in the country, such leaves are rarely granted by that office.

Upon receipt of a leave of absence petition from the department/program, the Graduate College will automatically approve the first leave, up to one year maximum. At least one term as a graduate degree student must be completed before being eligible for a leave. After returning to the program from an approved leave, a second leave is not automatic and will only be granted by the Graduate College (MS, PhD) or CON (DNP) for medical or other extraordinary reasons.

A leave will not be granted to doctoral candidates who have passed the preliminary exam, except for students whose programs require a formal off-campus activity (e.g., military deployment) or for documented maternity/family event, medical, family health crisis, or other extraordinary reasons. If this situation occurs, a Graduate Petition for Leave of Absence must be submitted to the Graduate College.

Degree-seeking students will automatically be approved leave, with proper documentation, for the birth or adoption of a child or where child care is required (one year maximum); care of a spouse, child, or parent with a serious health condition; or a serious health condition that makes the student unable to pursue graduate work. The Graduate College encourages students to obtain written acknowledgement (signature) from the Associate Dean for Academic Affairs. International students with any of these circumstances must also obtain approval from the Office of International Services.

Degree-seeking (domestic only) students who must leave the University in order to enter into active service with the armed forces in a national or state emergency will be given an indefinite leave. A copy of the orders to report/proof of active service must be attached. Special procedures exist for withdrawing from courses under these circumstances. See the relevant information under Military Leave Policy (below).

Time spent on leave approved by the department and the Graduate College does not count towards the time to complete the degree.

Students who have already registered for the term for which leave is requested must drop all courses using Student Self-Service. If completed before the first day of the term, all relevant charges for the term are eliminated. If done after the first official day of the term begins, a prorata refund will be given. Students are responsible for filing the appropriate forms and resultant charges; the leave of absence petition itself does not alter existing registration.
Students who are on an approved leave of absence will not be covered by the health and personal accident insurance plan until they return to active registration.

**Military Leave Policy**

**Undergraduate Students Withdrawing From the University to Enter Military Service:**

1. Are entitled to withdraw without penalty and without academic credit, and receive a full refund of tuition and fees.

OR

2. If withdrawal for deployment occurs upon completion of the 12th week of the semester, undergraduate students are entitled without examination to receive full credit for each course in which they attained a standing of “C” or better at the time of withdrawal. Students will receive the grade attained in each course at the time of withdrawal. Grades reported below C are recorded as W (withdrawn). Students using this option are not eligible for a full refund of tuition and fees. Nursing students and other students in majors that have licensing, credentialing or accreditation requirements are not eligible for this option.

3. **Policy Governing Graduating Seniors**

   A student in his/her last semester of study leading to graduation, who qualifies for full credit upon completion of the twelfth week, or later, of the final semester, may be recommended for the degree at the discretion of the student’s college and major department provided that the following conditions are met:
   
a. The student has been in residence at UIC for at least two full semesters (not including the term of withdrawal);

b. The student has met all requirements for graduation (including minimum scholarship requirements), except for those requirements that the student would fulfill by completing the courses for which he/she is registered at the time of withdrawal during the last term.

   A senior in good standing who withdraws from the University at any time to enter military service as a result of state or national emergency, and who does so enter within ten instructional days and who lacks no more than one-sixteenth of the total semester hours required for the degree, may, at the discretion of the student’s college and on approval of the major department concerned, be recommended for such degree. No such student who has acquired hours under the twelfth weeks rule adopted by the Senate, however,
shall be considered eligible for this privilege.

A “senior in good standing” is meant as one whose progress during University registration has been satisfactory to the administration officers of the student’s college. Among grounds for dissatisfaction might be negligence in meeting requirements or scholastic deficiencies.

“At any time” shall be interpreted to mean “during any semester in residence or the interim between semesters.” It is not intended that students who, after these rules are operative, stay out of college for any semester, and who thus do not make continuous progress to their degrees, shall be eligible for the privilege extended in these rules.

4. Campus housing residents are entitled to a prorated refund of room and board charges.

Undergraduate Students Returning to UIC after Military Service

1. Returning students must meet with the Veteran’s Registration Coordinator in the Office of Records and Registration and the Veteran’s Affairs Office Coordinator within the Office of Student Financial Aid.

2. Undergraduate students who have attended classes and withdraw from the university to enter military service are entitled to a leave of absence for a period of up to five years, and may return to the university without having to apply for readmission.

3. Students admitted to UIC as first time students, who did not attend any classes before deployment, are entitled to defer their admission for up to 24 months after their return from military service and may return to the university without having to apply for readmission.

4. All students returning from military service will have priority registration. A returning veteran must check in with the Veteran’s Registration Coordinator in the Office of Records and Registration in order to be granted priority registration.

5. All students returning from military service will have priority for on campus housing including the option of temporary campus housing while making a decision about where to live.

Graduate Students Withdrawing from UIC to Enter Military Service

1. Students are entitled to a full refund of tuition and fees.
OR

2. If withdrawal for deployment occurs upon completion of the 12th week of the semester, and before the end of the term, the student may ask the instructor(s) for permission to receive an Incomplete (I) or Deferred (DFR) grade(s). An instructor may assign an I or DFR if deemed academically appropriate and feasible. Alternatively, an instructor may assign a letter grade, if requested by the student, if the instructor deems it to be academically justified. Deadlines for incomplete grades under these circumstances may be waived upon the discretion of the instructor and the Graduate College. A student who chooses to withdraw from all courses will not receive Ws. It is the student’s responsibility to present proof of active service status for these actions to occur.

Leave of Absence for Graduate Students Called to Military Service

1. Students who must withdraw from the University due to the reasons stated above are given an indefinite leave of absence. A copy of the orders to report/prove of active service must be attached to the Graduate Petition for Leave of Absence form.
2. Time spent on leave approved by the department and the Graduate College does not count towards the time to complete the degree.
3. Students who are on an approved leave of absence will not be covered by the health and personal accident insurance plan until they return to active registration.

Refund on Withdrawal to Enter Military Service

1. The refund of tuition and fees for graduate students who receive financial aid from federal and state programs and private foundations will be governed according to the rules and regulations of those organizations.
2. For students who hold fellowships, the Graduate College will make every effort to restore those awards upon return to UIC.
3. Assistantships (teaching, research, or graduate) are awarded by colleges, graduate programs, research centers and administrative offices, and graduate students who have assistantships should check with those units about the availability of the assistantships upon return from active military service.
4. Graduate students living in University residences will receive a pro rata refund for room and board based on the date of withdrawal.
5. Deferred Graduate Degree Program Admission
6. Students admitted to a graduate and deployed before attending classes must check with their colleges regarding their policies about deferred admission.
Withdrawal from the University

Withdrawal from the University is an option for all CON students. Students who are considering withdrawing should first meet with their advisor to explore all options.

Withdrawal from the University is governed by specific regulations that must be observed to protect the student’s academic standing. Failure to withdraw officially from the University before the last day of instruction results in a grade of F (failure) appearing on the record for each course in which the student is registered.

Undergraduates

Undergraduate students should initiate an official withdrawal from the University in their college office in person or by written request. Telephone requests to withdraw must be verified by the student in writing.

Students who withdraw from all courses for which they are enrolled are considered withdrawn from the University. Students who withdraw from the University are eligible to register for a subsequent term unless they lose their continuing student status. Students lose their continuing student status when they have not attended UIC for two or more semesters in succession (excluding summer session or an approved leave of absence). Students whose enrollment has been interrupted for two or more semesters in succession must submit an application for readmission to the University.

A student who has been charged with an offense that may result in disciplinary action may not officially withdraw from the University until the hearing of the case has been conducted by the appropriate disciplinary committee.

Graduates

Graduate students dropping the only course, or all courses, for which they are enrolled should follow University withdrawal procedures.

Students who withdraw by the tenth day of the semester are not considered to have been registered for that term, and the withdrawn courses will not appear on the student’s transcript. Students who withdraw after the tenth day are considered “in residence” for that term, and are eligible to register for the next term. Please check the Office of Admissions and Records Web site for the summer session deadlines for withdrawing from courses. The withdrawn courses will appear on their transcript with a W grade.
Graduate students who wish to withdraw should inform their advisor and may withdraw before the tenth day of the semester by completing the process using Student Self-Service. Students who wish to withdraw after the tenth day may secure copies of the withdrawal form from the Associate Dean for Academic Affairs or the Graduate College. Please check the Office of Admissions and Records website for the summer session deadlines for withdrawing from courses. Graduate students in a degree program should initiate official withdrawal by consulting the Associate Dean for Academic Affairs for approval. Non-degree students who were not admitted to a specific department should initiate withdrawal from the Graduate College.

Note: Graduate students who fail to register for two terms in a row (excluding summer) without taking an approved leave of absence forfeit their admission to the Graduate College. Like students who have officially withdrawn from the University before the tenth day of the semester (fifth day in summer), they must reapply for admission to the Graduate College. Readmission is not guaranteed.

**Readmission**

Readmission applicants are former students at UIC who were registered as degree-seeking students and who left the University for two or more semesters in succession (summer session excluded). Readmission applicants are considered for readmission on the basis of their status at the time they left the University, any college work they have completed elsewhere since their last attendance at the University, and the availability of space in the chosen program. Students applying for readmission must complete an application but are not required to pay the application fee. (Note: Graduate students returning from an approved Leave of Absence do not need to apply for readmission.)

**Graduate student** readmission is granted upon approval of the CON's Admissions and Academic Standards Committee—Graduate and the Graduate College.

**Change of Address/Contact Information**

Students are strongly encouraged to review and make necessary updates to their personal information (address, telephone, emergency contact information) each term using the University portal, my.UIC (in the “Records” sub-tab under the “Academics” tab). Students should also report any change of address and/or phone number to the Office of Academic Programs or their regional campus.
Honors College

The UIC Honors College enhances opportunities for intellectual challenge and leadership by fostering a community of academic excellence, connecting outstanding undergraduate student with a CON Honors Fellow and promoting scholarly engagement. By bringing together exceptional undergraduate students, faculty and staff, the Honors College provides an environment for advanced intellectual growth and a foundation for life-long learning. Members of the Honors College may take honors courses or participate in an array of out of classroom experiences each semester. The process for transfer students to apply to the Honors College can be found here.

International Service Learning Opportunities

The Global Health Leadership Office at the CON supports numerous service learning opportunities in international settings around the globe. The International Program Development Initiative was developed to facilitate these opportunities and enhance planning and support services so that priorities of quality learning, safety, participatory engagement with local communities, sustainability, and cultural appropriateness are consistent program components of all global health activities. Students interested in participating in an international learning program should contact the Global Health Leadership Office.

Clinical Nurse Leader Certification Eligibility

Students in the Advanced Generalist Master's Program who would like to be eligible to sit for the CNL certification exam may register for an additional 270 clinical hours at the end of their program and prior to degree conferral. Students must request the additional clinical hours at least 9 months prior to the semester in which they plan to complete these hours and the AGMS degree. More information on the CNL and certification can be found at: http://www.aacn.nche.edu/cnc/overview.
Scholarly Project Requirements - Graduate and Professional Programs

Doctor of Nursing Practice Requirements

Students in the DNP program are required to complete a final DNP project. More information on the evidence-based practice project requirements can be found in the Doctor of Nursing Practice (DNP) Student Handbook.

PhD Requirements

Students in the PhD program should refer to the PhD Student Handbook for research and examination requirements. Thesis requirements may be found on the Graduate College website.

Research on Humans or Animals

Students using human subjects in any research (this includes surveys, interviews, preexisting data, and human tissue obtained for non-research purposes) must have approval from the Institutional Review Board or one of its approved committees before beginning data collection. Students using animal subjects must take GC 470—Essentials for Animal Research. The Graduate College and the CON also offer courses in research ethics. For further information, students should contact the Office for the Protection of Research Subjects, (312) 996-1711, 203 Administrative Office Building.

Graduation and Commencement

Filing Intent to Graduate

Graduation is not automatic. Eligible students planning to graduate in a given semester are required to file for graduation no later than the end of the third week (fall and spring) or second week (summer) of the term in which graduation is sought. Missing this deadline will delay graduation and the receipt of diploma. Filing for graduation is done through my.UIC. The “Declare your Intent to Graduate” link is in the "Academics" tab, "Records" sub-tab. Students who file for graduation in one term but do not complete their degree requirements in that term must file for graduation again in the new term in which they are attempting to graduate.
The University honors its graduates, their families, and significant others at a fall (December) and spring (May) commencement during the last week of the semesters.

The following conditions apply:

- Students who have completed all degree requirements in the summer and fall terms are eligible to participate in the fall commencement.
- Students who have completed all degree requirements in the spring term are eligible to participate in the spring commencement.
- Students who have not completed all degree requirements are not eligible to participate in commencement.
- PhD students who have defended their dissertations but did not submit dissertations to the Graduate College by due date for graduation may submit a petition to participate in commencement.

As with most College policies, students may petition the Associate Dean for Academic Affairs for exception(s) to this policy. Petition forms are found on the CON website.

**Certificate Programs**

Students in certificate programs (for example, Palliative Care Nursing, School Nurse, Teaching/Learning certificate programs) who have met all requirements for the certificate must complete the Intent to Complete Campus Certificates Form (https://registrar.uic.edu/student_records/certificates/) in order to receive a certificate from the University and have the certificate appear on the student’s transcript.

**College Commencement**

The University honors its graduates, their families, and significant others at a fall (December) and spring (May) commencement during the last week of the semesters.

The following conditions apply:

- Students who have completed all degree requirements in the summer and fall terms are eligible to participate in the fall commencement.
- Students who have completed all degree requirements in the spring term are eligible to participate in the spring commencement.
- Students who have not completed all degree requirements are not eligible to participate in commencement.
- PhD students who have defended their dissertations but did not submit dissertations to the Graduate College by due date for graduation may submit a petition to participate in commencement.

As with most College policies, students may petition the Associate Dean for Academic Affairs for exception(s) to this policy. Petition forms are found on the CON website.

**College Honors**

Undergraduate students who represent the top 15% of the class based on the nursing cumulative grade point average will receive College Honors. An apricot cord will be awarded to these students and a notation will be made next to the student’s name in the commencement program. Notations are not added to student’s transcripts or diplomas.

**University Honors**

The University Honors systems recognizes three separate distinctions for scholastic excellence in the overall (cumulative) grade point average. The three distinctions are as follows:
Summa cum laude 3.90 and above gold cord
Magna cum laude 3.75 to 3.89 silver cord
Cum laude 3.50 to 3.74 bronze cord

Students who completed their prerequisites at an academic institution other than University of Illinois at Chicago must meet the following criteria in order to be eligible for University Honors:

- A minimum of 42 hours at the University of Illinois at Chicago at the end of the term prior to the term of graduation.
- A minimum of 60 hours completed at UIC upon graduation. RN/BSN students are eligible for university honors.
- In addition, transfer students must have a UIC grade point average of 3.50 in order to qualify for university honors.

Please note that only students receiving their first degree who have completed a minimum of 60 hours at UIC are eligible. Cords will be distributed prior to Commencement and a notation will be made next to the student’s name in the commencement program.

Licensure and State Board Examination

Application Information

Following graduation from the BSN and Graduate Entry MS programs, students must successfully complete the state board licensure examination (NCLEX-RN) and be licensed by a state board of nursing in order to practice as a Registered Nurse.

Testing Accommodation

Accommodations for taking the NCLEX examination will only be made with authorization of the state board of nursing and the National Council of State Boards of Nursing (NCSBN). To request accommodation for testing in Illinois, students need to submit a Reasonable Accommodation Request for Examinees with Disabilities form and supporting documentation.

Candidates requesting accommodation should not schedule an appointment to take the NCLEX examination until they have received written confirmation of their accommodations and their ATT indicating “Accommodations Granted.” Students who are granted accommodations should refer to the NCLEX Examination Candidate Bulletin for further instructions on how to schedule their examination.
Preparation for the Examination

Students are encouraged to begin preparing early for the examination by reviewing content and taking practice examinations. There are many materials available for this purpose including books and computer programs. An on-campus NCLEX-RN review course may be available. Students who need help determining which review methods will work best for them are encouraged to consult with their instructors.

Retaking the Examination

Candidates who do not pass the examination must wait a minimum of 45 to 90 days before retaking the examination. The policy of determining the minimum frequency within which a candidate may retake the examination is established by each individual board of nursing and the NCSBN.

BSN students applying to the master's program or DNP must pass the examination and have their RN license before matriculating into the graduate program.

Students who do not pass the examination are strongly encouraged to contact someone in the CON (for example, a faculty member, their advisor, the Associate Dean, their regional campus office) for assistance in preparing to retake the examination.

Career Services

The CON holds job fairs each fall and spring. Recruiters from numerous hospitals and agencies provide information on externships and part/full-time employment opportunities.

Resume workshops, mock interviews, and other career services programs are also available throughout the academic year. Announcements with more information will be posted on the Update Board when more information is available.

The CON maintains a Job Board where students can search for employment opportunities. Students can also find a list of externships and new nurse residencies on the CON Update Board (“Career” tag). A list of excellent career resources is also available on the University of Illinois Alumni Association website.
Scholarships

The CON has several scholarship opportunities for incoming and current students. All internal scholarships have a March 1st deadline and can be found on the Scholarship and Awards Program (SnAP) webpage. Additionally, information about external scholarships is posted on the Update Board (“Scholarships” tag).

Student Leadership and Organizations

Student Organizations

The CON recognizes six student governance organizations:

- College of Nursing Student Council (CONSC)
- EMERGENCY
- Graduate Student Nursing Organization (GSNO)
- Student Nurses Association – UIC Chapter
- Urban Health Program College of Nursing Student Association (UCONSA)
- Men in Nursing

Standing Committees with Student Representation

Students are represented on the following CON committees and subcommittees. Students are elected through the Graduate Student Organization and Nursing Student Council. Students are expected to attend each meeting and provide voice on behalf of the student body.

- Curriculum Committee
- Academic Programs Evaluation Committee
- Research Committee

Sigma Theta Tau

Sigma Theta Tau International is the honor society of nursing. Its goals are to promote high professional standards, foster creative work, and encourage scientific research in all areas of nursing. The society establishes chapters at degree-granting colleges and university schools and has established the Alpha Lambda Chapter at the University of Illinois at Chicago. The membership criteria are as follows:
Graduate Students:
- Have completed ¼ of the nursing curriculum for their program
- Have a GPA of at least 3.5 (based on a 4.0 grading scale)
- Meet the expectation of academic integrity

Undergraduate Students:
- Have completed ½ of the nursing curriculum
- Have a GPA of at least 3.0 (based on a 4.0 grading scale)
- Rank in the upper 35 percent of the graduating class; and
- Meet the expectation of academic integrity

Student Academic Grievance Procedure

Students may encounter situations in which academic decisions are made about their performance which they do not understand or with which they do not agree. The Student Academic Grievance Procedures document provides a resource for productive problem-solving.

Informal Resolution

Students who have concerns or complaints about an academic decision made about them should begin their problem-solving with an attempt to resolve the matter informally. If the concern/complaint is course related this process starts with a discussion between the student and the instructor and, perhaps, the course coordinator if the course has multiple instructors. If the concern/complaint is in response to a Committee decision, this process would start with the Director of Pre-Licensure Programs or Director of DNP program as appropriate or Designee. If the concern is not resolved at this informal stage, the student who wishes to pursue the matter further can use the UIC student academic grievance procedure to seek resolution.

Specific guidelines for professional (DNP) students are included in the DNP Handbook.

There is a time limit for this process. Students must begin the formal grievance procedure within 40 days of the time at which they are made aware of the decision in question. Therefore, prompt action on informal resolution is encouraged.

Formal Grievance Process

The University’s Student Academic Grievance Procedures define the process through which students may seek resolution of complaints or grievances regarding academic standing
during their enrollment at UIC. Students wishing to file a formal complaint should refer to these procedures for the correct process. The first step of the procedure involves submitting the complaint in writing to the appropriate “Administrative Officer (AO).” For a faculty concern/complaint, the AO is generally the department head of the faculty against whom the complaint is made. If the concern/complaint is in response to a Committee decision, the AO is generally the Associate Dean of Academic Affairs or designee.

Student Ombuds Service

Students should always attempt to speak directly with the person(s) involved with their concern. If they feel that a fair resolution was not reached, they should research other options available within the CON. Students who feel that a fair and equitable resolution has not been reached after having exhausted all options have the right to request the assistance of the Ombudsperson. More information about the Student Ombuds Service can be found on the UIC Dean of Students website.

University Policies and Regulations

Students at the UIC CON should refer to the UIC Admissions and Records - Campus Policies website for information on the following university policies and regulations:

- Administrative Changes to the Schedule of Classes
- Campus Security Act Notification
- Disability Services Notification
- Emergency Information and Preparedness
- Grievance Procedures
- Inter-college Transfer
- Nondiscrimination Statement
- Policy on Continuing Student Status
- Policy on Students Holding Seats
- Refund Policy
- Student Participation in the Use of Animal in Class
- Student Records Policy
- Title IX – Student Sexual Misconduct

**About Title IX:** Title IX seeks to reduce or eliminate barriers to educational opportunity caused by sex discrimination in institutions that receive federal funding. This includes sexual harassment, sexual misconduct, and retaliation. Contact the Title IX Coordinator immediately if you believe that you have been
sexually harassed, are a victim of sexual misconduct, or retaliated against based on Title IX.

- Volunteer Emergency Worker Policy

Students should also familiarize themselves with the information contained in the university catalogs for their respective programs (undergraduate or graduate). In addition, graduate students should also review the Graduate College website for program information and regulations and special services for graduate students:

- Undergraduate Catalog
- Graduate Catalog
- Graduate College Website
APPENDIX A: Program Essentials, Outcomes, and Competencies

| IX. **Baccalaureate generalist nursing practice.** The baccalaureate graduate nurse is prepared to practice with patients, including individuals, families, groups, communities, and populations across the lifespan and across the continuum of healthcare environments. The baccalaureate graduate understands and respects the variations of care, the increased complexity, and the increased use of healthcare resources inherent in caring for patients. | 9. Provide safe, holistic, culturally appropriate, evidence-based nursing care that contributes to optimal patient outcomes across the lifespan. | **Knowledge**
K1. Integrates best evidence from nursing science and the humanities to provide holistic, patient-centered care. K2. Identifies the components of comprehensive and focused health assessments using developmentally and culturally appropriate approaches. K3. Describes the relationship between genetics and genomics when providing patient-centered care. K4. Comprehends the complexity of need and resource availability inherent in caring for patients across the continuum of healthcare environments (care management). **Skills**
S1. Applies the nursing process to deliver holistic, patient-centered care across the lifespan and in all healthcare settings. S2. Demonstrates appropriate patient teaching that recognizes culture, spirituality, and patient preferences and level of development, to foster health literacy and patient engagement in care. S3. Facilitates patient-centered care transitions. S4. Communicates effectively with members of the health care team, including patients and families. S5. Demonstrates clinical judgment and accountability for patient outcomes. S6. Advocates for patients' rights and involvement in their own plan of care. **Attitudes**

**Notes:**

- Learning opportunities, including direct clinical experiences, must be sufficient in breadth and depth to ensure the baccalaureate graduate attains these practice-focused outcomes and integrated the delineated knowledge and skills into the graduate's professional nursing practice.
- Clinical learning is focused on developing and refining the knowledge and skills necessary to manage care as part of an interprofessional team.
- Simulation experiences augment clinical learning and are complementary to direct care opportunities essential to assuming the role of the professional nurse.
- A clinical immersion experience provides opportunities for building clinical reasoning, management, and evaluation skills.

APPENDIX B: Student Affirmation Form
Student Affirmation Form

Directions: Please initial each statement and sign at the bottom of the form.

I understand that as a nursing student I am a member of a profession which places me in a position of confidence requiring the utmost discretion and professionalism to protect those with and for whom I work. I acknowledge that as a member of the nursing profession I have a responsibility to act in a manner consistent with the essential attributes of the profession. In this regard:

_____ I agree to protect the privacy of faculty, peers, patients, and family members of patients by not inappropriately disclosing confidential information about faculty, peers, patients or their family members that is disclosed to me in my capacity as a UIC College of Nursing student. In addition, I agree not to inappropriately disclose confidential information about my agency or institution that is disclosed to me in my capacity as a UIC CON student. I will adhere to HIPAA guidelines.

_____ I have / will read the syllabi of all nursing courses I take while a UIC College of Nursing student.

_____ I agree that I will conduct myself in a manner that exhibits professional values and in accordance with the American Nurses Association (ANA) Code of Ethics for Nurses.

_____ I will maintain and uphold the academic integrity policy of the UIC College of Nursing and will not condone or participate in any activities of academic dishonesty including, but not limited to, plagiarism, cheating, stealing or copying another’s assigned work, or lying about any situation.

_____ I will not recreate any items or portions of any exam for my own use or for use by others during my enrollment in the UIC College of Nursing.

_____ I will not accept or access any unauthorized information related to any exam administered during my enrollment in the UIC College of Nursing.

_____ I will not allow any student access to any of my paperwork for the purpose of copying.

_____ I will not discuss or post any information about faculty, peers, patients, family members, or any clinical facility on any electronic venue (i.e., Facebook, Twitter, Instagram, cell phones, etc.).

_____ I will not leave / save any patient, family, faculty, clinical facility, or student information on any open access desktop or hard-drive.

Please Note: This is a sample.
The actual Reportable Event Form is available on the UIC CON web site.
APPENDIX D: Reporting Guidelines for Unsafe Practices Form
Reporting Guidelines for Unsafe Practices

- This document should be used to report a student who conducts or is involved in unsafe practices, behaviors, or abilities which threaten the safety of said student or of others, or to report a student’s inability to safely meet the technical standards outlined by UIC College of Nursing.
- All signatures are required in the Reporter Information Section.
- This document must be submitted as soon as it is known that a student has been involved in unsafe incidents or fails to meet the Technical Standards.
- Document is to be signed by original reporter, and submitted to Course Coordinator for review and signature.
- Course coordinator must forward the report to the Designated Academic Officer or Associate Dean for Academic Affairs.

This form must be typed, to enter information, click within the gray area and begin typing.
